FROM

R H GUNION Esq,

Superintendent of Census Operations in Central India

TO

THE FIRST ASSISTANT TO THE AGENT TO THE
GOVERNOR GENERAL IN CENTRAL INDIA

Dated Indore Residency the 18th April 1893

SIR

I have the honour to forward herewith my report on the late Census of Central India which I was appointed to superintend by Foreign Department letter No 2577 I dated the 5th August 1890

2 The Indore Census office was in existence from that date till October 1892 At first it was the medium of the Census Commissioner's instructions being communicated to the Durbars through the various Agency offices and directly to the Durbars of Indore and Dewas When the work of enumeration was over the office was constituted as an abstracting office for the Indore Agency and continued at the same time to superintend the work of the other abstracting offices according to the instructions received from time to time from the Census Commissioner regarding the abstraction and tabulation of the Census Returns When the Tabulation Registers were completed and sent in to Indore from the Agency centres the office became a compilation office for the whole of Central India

3 Mr Munchersshah Bazonji Ragi Assistant Record keeper in the office of the Agent to the Governor General in Central India (and now Tutor to His Highness the Raja of Dewas Junior Branch) was selected for special duty in connection with the Census and his services have been at my disposal during the time that the Census operations lasted I am doing Mr Munchersshah no more than justice when I say that I could not have had a more energetic and capable assistant

4 The report comprises—

- (a) An account of Central India and its political and dynastic divisions followed by remarks on the returns of the Census compared where comparison was possible with those of the Census of 1881
- (b) A concise history of the Census operations in Central India from their inception in March 1890 till the completion of this report.
- (c) The Tables Imperial and Supplementary

5 I beg to thank the Political Agents in Central India, on whom the Census threw a great deal of additional work for their prompt attention to the instructions of the Census Commissioner and for their forbearance and courtesy to myself personally

I have the honour to be

SIR

Your most obedient Servant

R H GUNION

Superintendent of Census Operations in Central India

REPORT

ON THE

CENSUS OF CENTRAL INDIA, 1891

CHAPTER I

SECTION I—GENERAL DESCRIPTION OF CENTRAL INDIA

Central India the aggregate of States under the political care of the Agent to the Governor General in Central India may be roughly described as a great triangle the base of which is the course of the Narbada from Mathwar adjoining Rewa Kantha to about 60 miles east of Hoshangabad continued in an imaginary line to about 60 miles east of the town of Rewa and the apex is the most northerly point in the course of the Chambal about 30 miles south of Agra The triangle is by no means a perfect one Rajputana stretches into it on the north west the North Western Provinces on the north east and the Central Provinces on the south east while the Indore territory in Nimar extends over the Narbada into Kandesh and British Nimar and there is a break of continuity near Jhansi between the States of Uchha and Datia

2 Central India has otherwise been described as two irregular and detached tracts of territory converging near Jhansi and stretching in an arc east and west across the middle of the continent

3 This immense territory covering 78 219 square miles contains 79 States Thakurats etc more or less independent The larger of these are broken up into isolated parts Gwalior and Indore for instance having territory in almost all the agencies into which Central India is politically divided and this geographical confusion is aggravated by the fact that parts of Tonk and Jhalawar States under the Rajputana Agency lie in Central India while parts of Gwalior and Indore lie in Rajputana

4 A census of certain selected areas in Malwa was taken by Sir John Malcolm about 180 This partial census will be noticed hereafter and an attempt will be made to compare its results with those of the census of 1891 But the census of 1881 was the first systematic attempt to enumerate the population of Central India Many difficulties were experienced in that census for some of which inefficient administration was responsible This was largely due to the absence of geographical homogeneity in the areas to be dealt with to the country being split up into so many States large and small and to the intermixture already referred to of States and Agencies There were other difficulties as well great trouble was met with in the enumeration of the Bhils in the south west corner of the Agency and of the Kols Gonds etc in its eastern portion In the latter the wildness and difficulty of the country the want of means of internal communication, and the apathetic indifference of the Durbars to the advantages to be derived from an accurate record of population combined to make the enumeration difficult and its results more or less untrustworthy

5 The report on the census operations of 1881 says —

"Sufficient has been said to make it clear that no accurate deductions can be drawn from, or statistics erected upon, the figures which the statement contain. It is, in short, not safe to regard them otherwise than as a rough estimate of the people, and the facts connected with their existence. Possibly, when the time occurs for taking another census, the introduction of improved communications, with a concomitant increased prosperity of the country, may have induced more advanced ideas of administration, and an ability to discern the numerous fiscal advantages to be gleaned from a correct record of all details affecting the population. Meanwhile, what we now have is not altogether useless; many facts have been collected which are either of interest or importance, and the figures will serve as a foundation, though only an imperfect one, on which to rear a more carefully constructed fabric hereafter, whilst for the Province as a whole, it is not unreasonable to suppose that inaccuracies, exaggerations, and diminutions may have, throughout the many States, in some measure corrected themselves, and brought out for the whole a more accurate total than the manner in, and the circumstances under, which the census was taken would justify our crediting."

It is to be acknowledged that the hope expressed by the writer of that report, that the census of 1891 would be a much better one than that of 1881, have been in general fully realised. All the States have co-operated in the census as they would not have done had their rulers not been aware to the advantages to be derived from it, and it is worthy of particular note that Rewa, which in 1881 was characterised as "the most backward State in India," made in 1891 all its own census arrangements, both for enumeration and the subsequent tabulation of returns, and carried them out with a degree of accuracy and despatch which would have done credit to many districts in British India.

SECTION II—POLITICAL AGENCIES AND STATES IN CENTRAL INDIA.

6 The following are the agencies, or political charges, into which Central India is divided

- (1)—The Indore Agency, the districts immediately under the Agent to the Governor General, whose First Assistant holds, with regard to those districts, the position of a Political Agent.

The Indore Agency comprises the City of Indore, seven Parganas of the Indore State (Mhow, Samwer, Khudel, Harsola, Hatod, and Banganga), the town of Dewas, and a considerable amount of adjoining Dewas territory, the Gwalior Parganas of Neori and Bhaurasa, the Thakurat of Bagli, and three other guaranteed Thakurats

The towns* and villages in the Indore Agency are as under —

State	Towns	Number of Villages
Indore	Indore City Gautampura	387
Dewas (Senior)	} Dewas	{ 112 122
Dewas (Junior)		
Bagli	55
Gwalior Parganas of Neori and Bhaurasa	103
	Mhow Cantonment Indore Residency	

* Of over 5,000 inhabitants

As regards the State of Indore the greater part of its territory lies in other Agencies. Adjoining the City of Indore is the British Residency, a limited area assigned by treaty for the head quarters of the Agent to the Governor General and about 14 miles to the south west is the cantonment of Mhow. As regards the State of Dewas a great part of its territory as will be seen presently is distributed over the Western Malwa Bhopal and Bhopawar Agencies.

The two Gwalior Parganas Neori and Bhaurasa are parts of the Malwa Prant of that State, and are under a Mukhtarkar (equivalent in rank to a Suba) whose head quarters are at Neori.

(2)—The Gwalior Agency or the political charge of the Resident at

Gwalior is the most homogeneous of all the Agencies in Central India containing as it does no territory not belonging to Gwalior except the petty State of Kaniadhaba the small guaranteed holdings of Seopur Baroda Kathon and Pahargarh and a few villages belonging to the Maharaja of Khotoli in Kotah. The Gwalior territory in this Agency forms one of the three Prants (Gwalior Malwa and Esagarh) into which the Maharaja Sindia's dominions are divided. It is this Prant alone which is directly under the Resident the others being divided between the Indore Bhopal Western Malwa Bhopawar and Guna Agencies.

The river Chambal separates the Gwalior Prant on the north east and north west from the British districts of Agra and Etawa and from the Rajputana States of Dholpur Karauli and Jaipur.

Below is a list of the districts in the Gwalior Prant with the Parganas belonging to each —

District	Pargana	District	Pargana
To vargarh	Gom Parsa Ambah Gohd	Sabalgarh	S balga h S pur Dodh r B j yp
Gird Gwalior	Gid Ant Pho N rabad	Nawar	N rw Mangro l Bht w r Aron Sp r K laras Fah ri
Bhand	Bhnd Mau Ater Omari Mehagawa.	Bhandar	Bha der Indarkhi Daboh K r ra Picho
Sikawar	B gch Ma garl Jig Jora		

Note.—The Parganas of Esagarh and Chandriwar for purposes taken as parts of the Gwalior Agency.

In the district of Gird Gwalior lie the City of Lashkar the fortress of Gwalior, and the abandoned Cantonment of Morar. Adjoining these is the British Residency.

The chiefship of Kaniadhaba was transferred to the Gwalior from the Bundelkhand Agency in 1888.

The towns and villages in the Gwalior Agency are as under —

State	Towns	Number of Villages	Remarks
Gwalior	Iashkar Blund Karur Sabalgarh Gohad Baroda Morar Scopur Nirwar Bhandar Chanderi	1,027	The number of villages included 95 villages of Gwalior and 100 villages
Kaniadhana		17	

(3)—The Bhopal Agency comprises the State of Bhopal, the States of Narsinghgarh, Rajgarh, Khilchipur, Malsodangarh, Kurwai, Basoda, Muhimadgarh, and Pathari, the Pindara Jagirs, six guaranteed Thakurats of Gwalior, and two of Indore, the Gwalior districts of Bhilsa, Ganj-Basoda, and Sujalpur of the Esagarh Prant, and Sonekach of the Malwa Prant, the Indore districts of Zirapur, Machalpur, Gagrani and Nimawar, Sironj belonging to Tonk, Sirangpur belonging to Dewas, and Larawat belonging jointly to Dewas and Dhar

The Bhopal Parganas are —

Gairatganj, Chhipaner, Pikhon, Siddikganj, Mahalpur, Garhi, Juthari, Debipura, Jawar, Islamnagar, Bari, Barchy, Deori, Chandpur, Silwani, Bhairanda, Daurahia, Bhuri, Dewanganj, Bilkisganj, Shahganj, Tal Sehore, Ichhawar, Ashta, Nazirabad, Raisen, Mardanpur, Udepura Tehsil Huzur, Sewas, and Bersia

The Narsinghgarh Parganas are —

Narsinghgarh, Chhapahera, Pachor, and Khujner

The Rajgarh Parganas are —

Rajgarh, Kothda, Karanwaj, Kalpith, Nawalganj, Talen, and Biaora

The Khilchipur Parganas are —

Khilchipur, Bhojpur, Kherkhedi, Wamangaon, and Piplia

The Kurwai Parganas are —

Kurwai, Suthalia, Layra, Soharwasa, Battisi, and Mahabalpur

The Gwalior Guaranteed Thakurats are —

Agra Barkhera, Tappa, Dhabla Dhir, Kankarkhera, Kamalpur, Dhabla Ghosi, Dariakheri, Baodia, and Alnia

The Indore Guaranteed Thakurats are —

Patharia and Kherirajpur

The Gwalior Parganas are —

Sujalpur, Malhargarh, Sonekach, Bhilsa, and Basoda

The Indore Parganas are —

Zirapur, Machalpur, Tingachpur, Talen, Harangaon, Gagrani, Kantaphod Satwas, Rajore, and Nimawar

Bhopal, the most important State in the Bhopal Agency, has no outlying territory in other Agencies. Sehore, 23 miles south-west of the City of Bhopal, is the head-quarters of the Agency and a Cantonment.

The towns and villages in the Bhopal Agency are as under —

St t	T w	N mb f v l l g
Bh pal	Bhopal Ahta Bes a Sehore Ichhay ar Sehore Cantonme t	3 167
Gwal o	Bhul a S jalp r Mangaol	1 340½*

Bar undla	B r	Ba ka P ha

Th m Md t ct f S d (village) bel g j ntly to Gw l I d e d Dh

The Pargana of Alampur, belonging to Indore, is included in the Bundelkhand Agency. The Cantonment of Nowgong is the head-quarters of the Agency. The following list gives the names of the Parganas of the larger States —

The Urchha Parganas are —

Urchha, Terhi, Palhera, Jatwara, Teharoli, Baldeogarh, Pirthipur, and Paharsinghpur

The Panna Parganas are —

Panna, Samaria, Dharampur, Aktohan, Ghorra, Shalinagar, Pawai, Singhpur, Birsinghpur, and Bakswaha.

The Datia Parganas are —

Datia, Indragarh, Seonda, Nadigaon, and Baroni

The Chhatarpur Parganas are —

Chhatarpur, Rajnagar, Mau, Deora, and Lauri

The Charkhari Parganas are —

Maharajnagar, Rampur, Bawan Chaurasi, Isanagar, and Sitwara

The Bijawar Parganas are —

Rajauli, Satai, Shahgarh, Gulganj, Bamoura, and Karahira.

The Ajaigarh Parganas are —

Ajaigarh, Zargati, Bangla, Barwara, Mahaiwa, and Pathar

The Samthar Parganas are —

Samthar, Lohargarh, Maharajgarh, Amargarh, and Sami

The towns and villages in the Bundelkhand Agency are as under —

State				Towns	Number of Villages
Urchha	.	.	.	Tikamgarh . . .	658
Panna	.	.	.	Panna . . .	858
Datia	.	.	.	Datia . . .	454
				Seonda	
				Nadigaon	
Charkhari	.	.	.	Maharajnagar . . .	270
Chhatarpur	.	.	.	Chhatarpur . . .	315
Samthar				Samthar . . .	90
Bijawar	.	.	.	Bijawar . . .	299
Ajaigarh	.	.	.		361
Other petty States	.	.	.		370
				Nowgong Cantonment	

(5)—The Baghelkhand Agency, which covers about 11,323 square miles, includes Rewa and the small States of Nagode, Sohawal, Maihar, and Kotha

The Rewa Parganas are —

Rewa Tahsil, Ramnagar, Verdi, Tiothar, Madhogarh, Mauganj, and Manpur

The towns and villages in the Baghelkhand Agency are as under —

State	To	Number of Villages
Rewa	Rewa Satna	5431
Mithar	Mithar	183
Nod	Unchhera	334
Solsal		173
Kothi		67

(6)—The Western Malwa Agency This Agency includes the States of Jaora Ratlam Sulsana and Sitamau the guaranteed holdings of Piplauda Panth Piplauda Bhatkheri Lalgarih Kalakhera Narwar Sarwan Uparwar Khojankhera Shajasta Tal Bilode and Sedri 20 Parganas of Gwalior (Malwa Prant) 21 Parganas of Indore the Alote Pargana of Dewas (Senior Branch) and the Ringnode and Garguchha Parganas of Dewas (Junior Branch)

The Gwalior Parganas are —

Agar Susner Nalkhera Barode Shahjapur Tonk Mandsaur Nahargarh Bhaugarh Afzalpur Sukhera, Nimach Jawad Singoli Ganganpur Ujjain Barnagar Khachhrod Unail and Panbehar

The Indore Parganas are—

Mehidpur Laitha Jirda Tarana Jagoli Kuranjmakron Rampura Garote Sunail Kotri Raipur Manasa Chandwasa Kharaoda Satkheda Naraingarh Antri Kanjardah Nandwas and Depalpur

The Western Malwa Agency contains the two cantonments of Nimach and Agar the latter of which is also the head quarters of the Political Agent

The towns and villages in the Western Malwa Agency are as under —

State	Towns	Number of Villages
Gwalior	Ujjain Mandsaur Nimach Shahjapur Baragar Khachhrod Jawad Agar Nimach Cantonment	1454
Ratlam	Ratlam	218
Jaora	Jaora Tal Mandsal	327
Indore	Rampura Mehidpur Bhanpura, Tarana Manasa, Sunail	1231
Sitamau	Sitamau	91

State	Towns	Number of Villages
Sailana . . .	Sailana . . .	76
Tonk . . .	Pirawa . . .	121
Piplauda . . .		24
Panth-Piplauda . . .		10
Dewas (Senior) . . .		75
Dewas (Junior) . . .		61

(7)—The Bhopawar Agency This Agency contains the States of Dhar, Jhabua, Barwani and Ali Rajpur, the chief-ships of Jobat, Kathiwara, Mathwar and Ratanmal, the guaranteed Thakurats of Dotria, Kachhi-Baroda, Bakhtgarh, and Multhan, the guaranteed Bhumias of Rajgarh, Garhi, Kalibaori, Bharudpura, Kothedis, Chiktiabad, Chhota Barkhera, Bara Barkhera, Jamnia, and Nimkhera, the Gwalior district of Amjhera (Malwa Prant), the Nimar districts of Indore, and the British Pargana of Manpur

The Dhar Parganas are—

Dhar, Bari Khasgi, Badnawar, Nalcha, Mandu, Dharamपुर, Kuksi, Thikr Sultanabad, and Nimanpura.

The Barwani Parganas are—

Barwani, Rajpur, Anjode, Jalgona, Patti, and Silawad

The Jhabua Parganas are—

Jhabua, Rajola, Bori, Kanas, Ranapur, Kundanpur, Pitor, Rambhapur, Harinagar, Parmalia, Thandla, Khawasa, Karwad, Sarangi, Hanu-mangarh, Mehidawa, Raipuria, Lakhnaoda, Umarkotah, Kalianpura, and Bhagore

The Ali Rajpur Parganas are—

Ratha, Takarwara, Walpur, Sondwa, Chhaktala, Phulmal, Chandpur, Amkhat, Barzar, Bhabora, Ziran, Nanpur, and Khatali

The Gwalior territory comprises the Parganas of Amjhera, Tanda—Balwari Bagh, Bakanair, Dikthan, and Sagor

The Indore part of Nimar contains the parganas of —

Maheshwar, Kesarwar, Pipalgond, Dargaon, Karhai, Mardana, Amleta Barwai, Katkut, Khargone, Sanawad, Muhamadpur, Khadgaon, Bhikamgaon, Silondri, Una, Barode, Balakwada, Palia Dawli, Nagalwadi, Brahmangaon, Chikalda, Lawani, Dahli, Hasilpur, Betma, and Pitlawad

The towns and villages in the Bhopawar Agency are as under —

State	Towns	Number of Villages
Indore . . .	Maheswar Khargone	1,269
Dhar . . .	Dhar Kuksi	526
Barwani . . .	Barwani	343
Jhabua . . .		736

State	Towns	Number of Villages
Ali Rajpur		36
Jobat		61
Mathura		46
Mathar		35
Ratanmal		13
Guaranteed Thakurats		83
" Bhils		190
Gwalior		459
Dewas		31
Manpur (British Pargana)		32

8 The Guna Agency contains the petty States of Dharnaoda, Khiaoda, Bhadaura, Sirsi, Umri, Raghogarh, Parone, and Gurrah. The Gwalior Parganas of Myana, Pachhar, Arone, Ranod, Bajrangarh, Chachoda, and Kumbraj, and Chhabra belonging to Tonk.

The towns and villages in the Guna Agency are as under —

State	Towns	Number of Villages
Tonk	Chhabra	187
Dharnaoda		30
Khiaoda		6
Bhadaura		12
Sirsi		35
Umri		27
Raghogarh		104
Parone		59
Gurrah		57
Gwalior		1040

SECTION III — DENSITY OF POPULATION

7 In the Central India Census Report of 1881, Final Form I (General Statement of Area and Population) was the only table in which areas had any place. In that Form the States were not arranged as they were in the other tables, and in some cases the areas of more than one State were lumped together. As regards the areas given in the table referred to, the writer of the 1881 report says —

Unfortunately the separate areas of some important States are indeed the largest in Central India cannot be ascertained, and it is impracticable therefore to frame any

even approximate detailed statistics concerning the density of the population. We are dependent for our figures connected with areas on the Topographical Survey Department, and the classification adopted, notably for Gwalior and the twelve States which head the list of Statement I, *1 c*, for a total area of 29,066.08 square miles,—a classification which is neither geographically nor politically correct, as well as that for many other States improperly grouped together, renders any calculation, founded on the exact area of each, quite impracticable. For the total of Central India the population is given at 9,261,907 souls, which, distributed over an area of 75,229.64 square miles, gives a density of 123.12 persons per square mile, which may be accepted as approximately correct."

8. For this census the Surveyor-General was requested to furnish the area of each State separately, and, in the case of States having territory in more than one Agency, the area of those States in each Agency, and to give, apart from those areas, the land occupied by Railways, Cantonments and Agency head-quarters. But he could not furnish the areas of States by Agencies, the boundaries of the latter not being shown in the Topographical Standard Sheets. The consequence is that Table I of the present report has no area, except that of Central India as a whole. And even that area cannot be accepted as strictly accurate, having necessarily been made up from figures got from various sources. The only detailed areas available are those given in the Supplementary Statement of Area and Population on page 293. To furnish the State figures for that statement occupied much of the time of the Surveyor-General's office for five months. As the boundaries of only one or two of the Cantonments and Agency head-quarters were defined in the Surveyor-General's maps, all such areas are in the Supplementary Statement, included in the area of the States in which they lie. The areas also of land occupied by the various Railways is included in the State areas. In the 1891 census Agencies, and not States, as in 1881, are reckoned as districts for census purposes. The former is no doubt the more symmetrical mode of arranging the census returns, but what is gain in one way is loss in another, through it having been found impossible to procure Agency Areas.

9. As regards their total population, the Agencies into which Central India is divided fall into the following order —

Total population of Central India	Bhopal	.	.	.	2,006,859
	Gwalior	.		.	1,757,509
	Baghelkhand		.	.	1,737,606
	Western Malwa			.	1,619,368
	Bundelkhand	.			1,508,053
	Bhopawar	.			978,652
	Indore			.	372,792
	Guna	.	.	.	337,973
Total population of Central India					10,318,812

10. From the circumstances just mentioned, in order to get any information as to the density of population, how it varies district by district, how far it has changed since 1881, and in what direction the change has been, recourse must be had to the Supplementary Statement on page 253. Even that is not altogether what it professes to be. The area given for Gwalior, for instance, includes that of several petty States, which, though subsidiary to it, are not integral parts of its territory.

11 The area of Central India as a whole is 78,192 square miles. This figure includes Railways Cantonments and Agency head quarters and the British Pargana of Manpur. The population of Central India according to the present census including the population of the Tonk districts in Malwa and excluding that of the Indore and Gwalior districts in Meywar is 10,318,812 or 131.92 per square mile.

12 In 1881 the area of Central India was returned as 75,229.64 square miles and the total population as 9,261,907. But that return is admittedly incorrect. For one thing it does not include the area of the Tonk districts (878 square miles) nor does the population as then returned include the population of those districts. In order therefore to compare the density of the population in 1881 and 1891 we must take the area as now given (which is at any rate approximately correct) minus the Tonk area and subtract the 1891 population of the Tonk districts from the total 1891 population of Central India. Such a calculation gives 119.76 per square mile as the density of the population in Central India in 1881 as against 131.08 in 1891.* Roughly speaking there is an increase since 1881 of eleven persons per square mile.

13 It is worth noting here that Sir John Malcolm in 1800 found the population of those parts of Malwa which he subjected to a census to be 98 to a square mile which he says may safely be taken as a scale for the present reduced population of Central India.†

14 Taking the chief States of Central India the density of their population in 1881 and 1891 is as under—

S	Area	P		Area Dec ea	A	
		88	89		N ER Q	M P
					88	89
Gwalior	58,463	3,754	3,483.5	+4.87	6.93	134.73
Indore	97,579	51,237	99,990	+45.753	8.5	3
Bhopal	69,969	95,490	95,486	— .45	36.49	36.4
Rewar	12,676.6	13,544	58,943	+2.389	96	9.3
Ujjain	2,798	3,544	333	+506	49.77	6
Dat	9,25	8,598	80,44	+3.84		4.3
P	2,49	73.6	39,333	+7	9	96.4
Dh	1,775	49.44	69,474	+3	84.8	95.47
Ratlam	7,95	87.34	89.6	+3.46	9.69	2
Jais (cl d G Ppl u d)	691.5	77	3.44	+365	73.64	8.63
Dw	88.5	4.6	5.73	+9.9	61.9	7.3
Rajgarh	957	7,533	19,489	+9.56	78	4.83
Narsingh	669.6	4.7	6.8	+3.53	67.90	73.65

15 The area of Gwalior appears to have been considerably over estimated in 1881. As now stated it includes several independent petty States in the Guna Agency and several Guaranteed Thakurats in the Gwalior Indore and Bhopal Agencies. The areas of those holdings cannot be separately stated but taking their combined

† The density of the Tonk districts in 1881 was 119.76 per square mile. The density of the Tonk districts in 1891 was 131.08 per square mile. The density of the Tonk districts in 1800 was 98 per square mile. The density of the Tonk districts in 1881 was 119.76 per square mile. The density of the Tonk districts in 1891 was 131.08 per square mile. The density of the Tonk districts in 1800 was 98 per square mile.

population, and applying the average density of the whole area given for Gwalior (134 73), the area of the Gwalior State by itself cannot be more than 24,700 square miles

16 Rewa has made the greatest increase (seventeen) in the number of persons per square mile. This is rather striking, considering the barrenness of the greater part of the territory of Rewa. Indore with her miles and miles of fertile soil has increased only five per square mile. Gwalior stands next to Rewa with an increase of sixteen. But it must be borne in mind that in 1881 the census of Gwalior was taken very imperfectly, both the enumeration and the subsequent operations (done by State officials) having been very carelessly carried out.

17 The decrease in the population of Bhopal is remarkable, and there is nothing to explain it. Still more remarkable is the smallness of the increase (only three per square mile) in the population of Ratlam, considering the number of immigrants that work on the Godhra-Ratlam Railway must have brought into the State, and the large increase (fifteen per square mile) in the population of the adjoining state of Jaora. The increase in the number of villages (to be presently mentioned) in Ratlam makes the anomaly still more glaring. The nomadic habits of the Bhils can scarcely account for so great a disparity.

SECTION IV—TOWNS AND VILLAGES URBAN AND RURAL POPULATION

18 The following table shows the towns and villages in Central India

STATE	NUMBER OF TOWNS				NUMBER OF VILLAGES			
	1881	1891	Increase	Decrease	1881	1891	Increase	Decrease
Gwalior	20	23	3		9,780	9,551		229
Indore	4	12	8		3,725	3,511		214
Bhopal	5	6	1		3,006	3,167	151	
Rewa	3	2		1	5,078	5,432	354	
Urchha	1	1			652	658	6	
Datia	3	3			451	454	3	
Panna	1	1			867	858		9
Dhar	2	2			502	530	28	
Ratlam	1	1			162	218	56	...
Jaora	1	2	1		315	327	12	
Dewas	2	1		1	455	474	19	...
Rajgarh	1	1			637	631		6
Narsinghgarh	1	1			416	419	3	
Other States, etc	8	13	5		5,419	6,185	766	
TOTAL	53	69	16		31,465	32,415	950	..

Note.—The 1891 totals in this statement include 3 towns and 698 villages belonging to Tonk, which the 1881 totals do not include.

- 19 Several places that were reckoned as towns in 1881 are not so reckoned in 1891. Jhansi has become British territory. Four Gwalior towns besides Jhansi have disappeared —

Towns

Burda Bhilgarh Gungapur and Kuliras. Rajgarh was reckoned as a town of the State of that name in 1881 evidently by mistake for Bhaora which is the name of the capital of Rajgarh. Srangpur* also (Dewas) Bangura (Rewa) Raswas (Bhopal) and Seora (Datia) are no longer reckoned as towns.

- 20 On the other hand in this census 25 places are returned as towns which were not so taken in 1881 —

Eight of Gwalior Jaurd, Karan, Narwar Mangauli Sabalgarh Bhandar Gohad and Chandori

Eight of Indore Rampura Maheshwar Khargone Bhanpura Tarani Manasri Sunail and Gautampura

Two of Bhopal Bersia and Ichhawar

One of Rajgarh Bhaora which appeared wrongly as Rajgarh in the 1881 Report

One of Nagode Unchehri

One of Jaora Tal Mandawal

One of Sailana Sailana

There are also three towns in the Tonk districts in Central India viz Sirony Chhambra and Pirawa which were not included in Central India in the 1881 census.

- 21 The total number of villages in Central India is 32,415. In 1881 it was returned as 31,465. But in 1881 the Tonk territory in the Bhopal Western Malwa and Guna Agencies containing 698 villages was not included. Allowing for those villages and for the exclusion in 1881 of the Rewa and Nagode Villages in Allahabad and Jabalpur † and setting the increase (24) in the number of places reckoned as towns against the decrease (8) there are 181 more villages in 1891 than there were in 1881.

- 22 There is a marked decrease in the number of villages in Gwalior and Indore a slight decrease in Panna and Rajgarh and an inexplicably large increase in Rewa and Ratlam. The decrease in the number of villages in Gwalior taken along with the great increase (sixteen per square mile) in the population of the State can be explained by the fact that the average number of persons in a village as will be seen from a subsequent statement has largely increased in Gwalior and this is probably due to the prevalence of dacoity in some parts of the State. The large increase in the number of villages in Ratlam is the more striking as the population of that State has increased only three per square mile.

- 23 The total population of Central India is in this census returned as:—

Urban	964,538
Rural	9,354,274

In 1881 the figures were—

Urban	799,687
Rural	8,462,220

Leaving the urban population out of consideration for the present we have an increase in the total rural population of 892,054. Deducting 156,354 for the rural population of the Tonk districts not included in 1881 we find the real increase to be 735,700.

S. g. w. 1889 did bet. between the Senior and J. B. ches of th. D. w. Stat. d. ther. f. th. p. rts. w. cou. t. for a town.
† See p. g. 71

24 This 9,354,274, the amount of the rural population, is spread over 32,415 villages. Thus the average population of villages is 288 as against 269 in 1881. The following statement gives the figures for the larger States of the Agency —

STATE	NUMBER OF VILLAGES		RURAL POPULATION		POPULATION PER VILLAGE	
	1881	1891	1881	1891	1881	1891
Gwalior	9,780	9,551	2,718,560	3,051,511	277.9	319.8
Indore	3,725	3,511	969,928	950,690	260.3	270.7
Bhopal	3,006	3,167	883,329	860,305	293.8	271.6
Rewa	5,078	5,432	1,271,098	1,178,546	250.3	272.1
Urchha	652	658	293,170	315,410	449.6	479.3
Datia	451	454	140,789	117,387	312.1	324.6
Panna	867	858	212,630	224,628	245.2	261.8
Dhar	502	530	127,808	144,698	254.6	273.0
Ratlam	162	218	56,248	59,338	347.2	272.1
Jaora	315	327	88,532	90,685	281.0	277.3
Dewas	455	474	116,698	137,005	256.4	289.0
Rajgarh	637	631	110,652	113,013	173.7	179.1
Narsinghgarh	416	419	101,027	107,719	242.8	257.0

25 The most remarkable fact in this statement is that in Gwalior the average number of persons in a village has risen from 277 to 319. The number of villages in Gwalior, as we have already seen, has decreased. The rural population in Gwalior has increased since last census in a higher ratio than the urban, and to a greater extent than in other States.

The abandonment of villages in consequence of dacoity is, as above stated, the probable reason of the decrease in the number of villages and of the increase in the average population of villages.

26. The following statement gives the number of persons to a house in the larger States —

STATE	Number of houses	Population	Number of persons to a house
Gwalior	600,894	3,378,774	5.62
Indore	224,204	1,099,990	4.90
Bhopal	189,693	952,486	5.02
Rewa	278,153	1,508,943	5.42
Urchha	62,725	333,020	5.26
Datia	31,057	186,440	6.00
Panna	49,044	239,333	4.88
Dhar	33,573	169,474	5.04
Ratlam	20,670	89,160	4.31
Jaora	23,866	117,650	4.93
Dewas	28,778	152,073	5.28
Rajgarh	23,055	119,489	5.18
Narsinghgarh	20,602	116,280	5.64

The Supplementary Statement of Area and Population on page 93 does not distinguish occupied houses in urban from those in rural areas state by state as Table I distinguishes them Agency by Agency

27 As regards the number of persons to a house in urban and rural areas respectively Sir John Malcolm wrote of his census — The number of persons to each house was found to differ considerably in different districts. In the City of Indore it was a fraction more than five while in many villages near that capital the number did not exceed four. Perhaps five may be taken as the average. * It is a remarkable fact that in the census of 1891 the Indore Agency (which of course includes the City of Indore and several of the districts which were included in Sir John Malcolm's census) is the only one in Central India which has a larger population per house in urban than in rural areas. The figures for the different agencies are as under—

Agency	Urban	Rural
Indore	5.17	4.87
Gwalior	4.59	6.53
Bhopal	4.6	5.08
Bundelkhand	4.83	5.3
Baghelkhand	4.57	5.36
Western Malwa	4.77	4.96
Bhopal	4.65	4.85
Guna	3.95	5.41

The high figure for Gwalior rural areas is noticeable in connexion with what has been said above regarding the increase in the population and the decrease in the number of villages.

8 The total urban population returned in 1891 is 964,538 as against 799,687 in 1881 an increase of 164,651. The total rural population returned in 1891 is 9,354,274 as against 8,462,220 in 1881 being an increase of 892,054. As has already been said nine places taken as towns in 1881 were not so taken in 1891 and twenty five places have been taken as towns in 1891 which were not so taken in 1881 so there are sixteen more towns in 1891 than there were in 1881. The aggregate population of the towns which have disappeared was in 1881, 90,956 while the aggregate population of the so to speak new towns is 166,468 in 1891. As the definition of a town for census purposes was practically the same in 1891 as it was in 1881 (the stipulations as to Municipality Markets and Chaukidari Act not being applicable in Central India) those figures give some idea of the migration of the population from town to country and from country to town. For the whole Agency the urban population has increased about 17 per cent while the rural population

has increased only 9½ per cent The subjoined statement gives the figures for the larger States—

STATE	TOTAL POPULATION		Increase or Decrease	URBAN POPULATION		Increase or Decrease	RURAL POPULATION		Increase or Decrease
	1881	1891		1881	1891		1881	1891	
Gwalior	3,074,979	3,378,774	+ 353,795	306,419	324,233	+ 17,814	2,718,560	3,054,541	+ 337,306
Indore	1,054,737	1,099,990	+ 45,753	84,309	149,300	+ 64,991	970,428	950,690	- 19,738
Bhopal	954,901	952,486	- 2,415	71,572	92,181	+ 20,609	883,329	860,305	- 23,024
Rewa	1,305,124	1,508,943	+ 203,819	34,006	30,397	- 3,609	1,271,098	1,478,546	+ 207,448
Urchha	311,514	333,020	+ 21,506	18,314	17,610	- 704	293,200	315,410	+ 22,210
Datia	182,598	186,440	+ 3,842	41,809	39,053	- 2,756	140,789	147,387	+ 6,598
Panna	227,306	239,333	+ 12,027	14,676	14,705	+ 29	212,630	224,628	+ 11,998
Dhar	149,244	169,471	+ 20,227	21,436	24,776	+ 3,340	127,808	144,695	+ 16,887
Ratlam	87,314	89,160	+ 1,846	31,066	29,822	- 1,244	56,248	59,338	+ 3,090
Jaora	108,434	117,620	+ 9,186	19,902	26,964	+ 7,062	88,532	90,656	+ 2,124
Dewas	142,162	152,073	+ 9,911	25,464	15,068	- 10,396	116,698	137,005	+ 20,307
Rajgarh	117,533	119,489	+ 1,956	6,881	6,476	- 405	110,652	113,013	+ 2,361
Narsingharh	112,427	116,780	+ 4,353	11,400	8,561	- 2,839	101,027	107,719	+ 6,692

29 The total population according to the Census of 1891 is 10,318,812 Of

Increase of population by sexes since 1881

these 5,395,536 are Males and 4,923,276

Females In 1881 the figures were —

Total 9,261,907, Males 4,882,823 and Females 4,379,084 So there is a recorded increase of 1,056,905 in the total population, an increase in the males of 512,713, and in the females of 544,192 But it must be remembered that the 1891 figures include the population of the Tonk districts in Central India, which was not included in the figures of 1881 The population of those districts is now returned as 181,135 (Males 96,345 and Females 84,790). So the actual total increase is only 875,770 or 8.63 per cent, the actual increase in the male population is 416,363 or 7.85 per cent, and that in the female population is 459,402 or 9.49 per cent

SECTION V—MOVEMENT OF THE POPULATION

30 Increase of population is of course due partly to natural causes and

Immigration

partly to immigration To estimate the amount

due to immigration we take Table XI along with

Table II We find the total number of persons born and censused in Central India according to the 1891 Census to be Total 9,564,632, Males 5,034,533, Females 4,530,099, or 92.69, 93.30, 92.01 per cent., respectively The immigrants are only about 6 per cent, divided as under —

	Total	Males	Females
From the Central Provinces . . .	117,878	52,895	64,983
From Rajputana	240,317	118,841	121,476
From North-West Provinces . .	260,678	115,440	155,238
From elsewhere	135,307	83,827	51,480
Total immigration recorded in 1891			
Census	754,180	361,003	393,177

* This is only an apparent decrease see footnote on page 13

Immigrant by the 1881 Census

31 The immigration recorded in the 1881 Census was as under —

	Totals	Males	Females
From the Central Provinces	78 258	36 188	4 070
From Rajputana	157 744	71 278	66 466
From the North West Provinces	20 565	95 022	107 543
From elsewhere	65 276	39 348	25 928
Total immigration recorded in 1881 Census	483 843	241 836	242 007

32 Entering now into more detail the following statement gives the proportion of immigrants for the different Agencies of Central India —

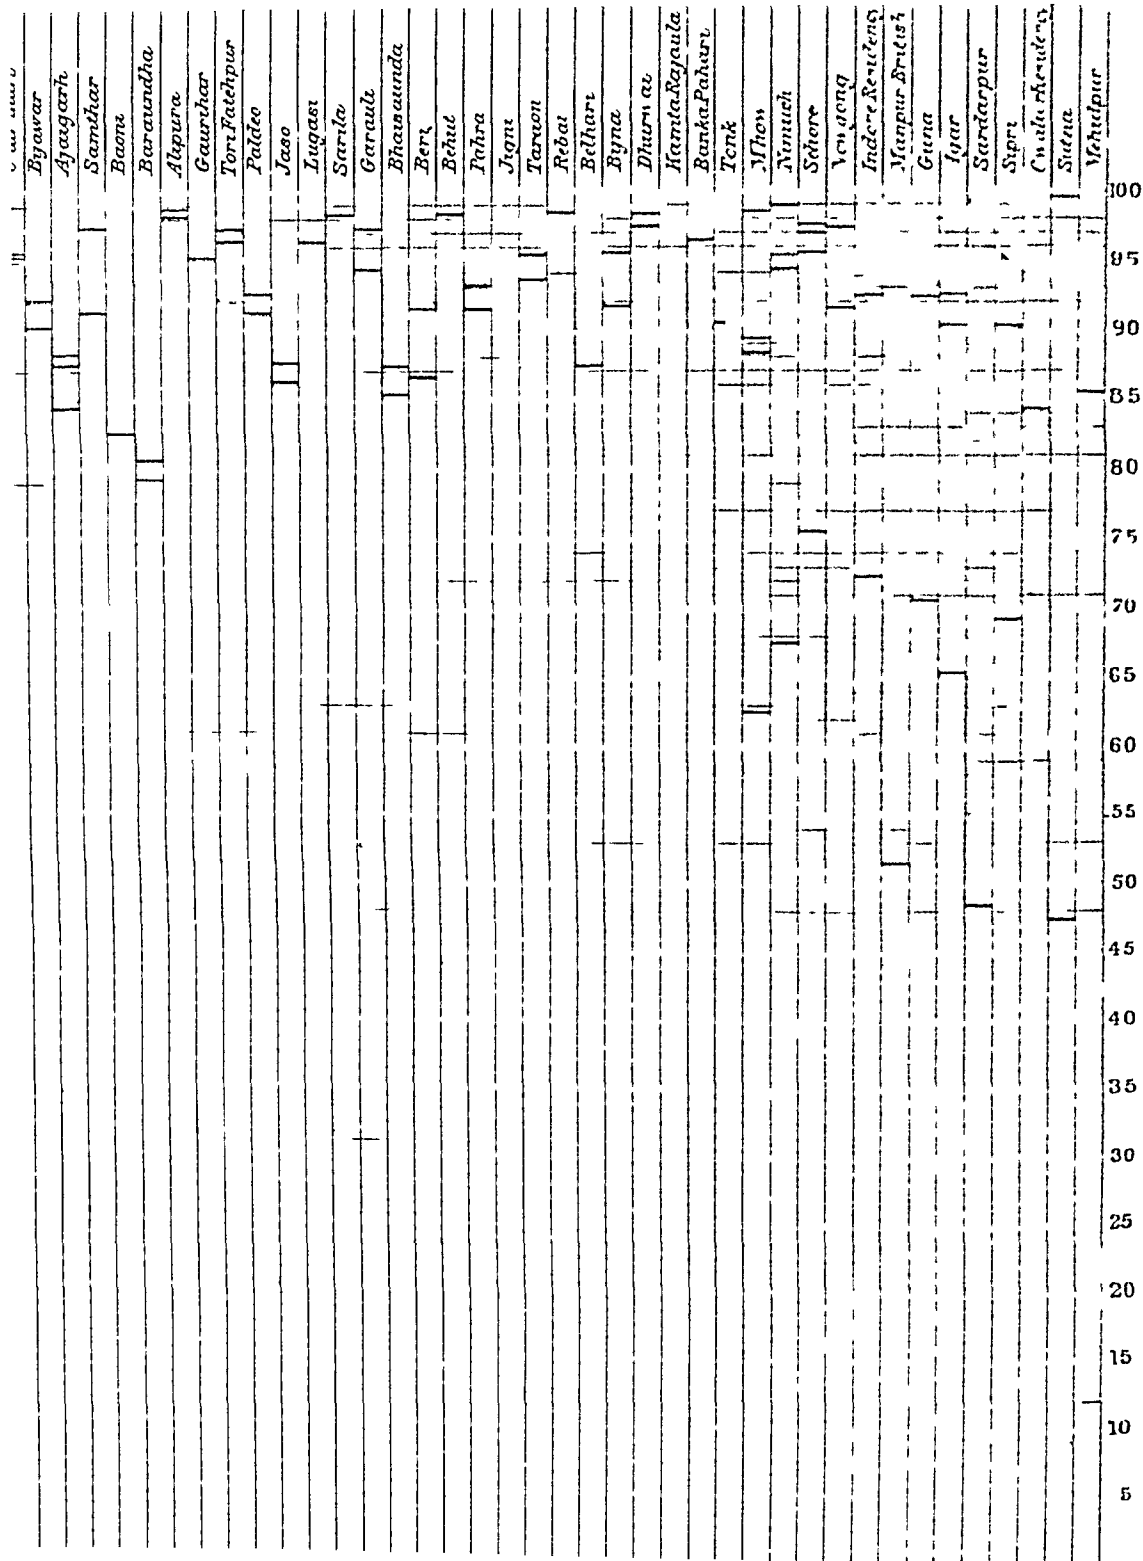

Agency	Immigrants	Returned
Indore	84 30	15 70
Gwalior	94 84	5 16
Bhopal	93 29	6 71
Balakhanda	90 98	9 02
Baghelkhand	95 24	4 76
Western Malwa	9 00	8 00
Bhopalwar	90 44	9 56
Guna	92 48	7 48

33 As regards migration from one State in Central India to another the intermixture of State and Agency boundaries makes it impossible to give figures of any approach to accuracy. For instance Indore has territory in every Agency in Central India except Gwalior Baghelkhand and Guna and a man returned as born in Indore may have been born in any one of the Agencies except those mentioned and such a man being returned among the population of the Indore Agency may, or may not be resident in the Indore territory in that Agency. However the movement from one State to another is very slight in Central India as may be seen from the following statement regarding those States which have territory in one Agency only —

State	Total Population	Returned from State	Returned from Agency	Returned from District	Returned from Province
Rewah	1 508 943	1 452 567	1 446 509	99 58	4
Bhopal	952 486	873 178	866 052	99 18	82
Uchhal	333 020	3 1497	316 084	98 54	146

For the year ended 1891 with 1881 population See page 10

State	Total population	Returned as born in the State	RETURNED AS INHABITANTS OF THE AGENCY IN WHICH THEY STATE LIVES		RETURNED AS BORN IN THE STATE AND INHABITING ANOTHER AGENCY
			Number	Percentage	PERCENTAGE
Panna	239,333	222,075	209,836	94 91	5 09
Datia	186,440	182,580	160,525	87 92	12 08
Chhatarpur . .	174,148	171,892	169,821	98 79	1 21

Gaurihar	10,148	7,457	7,457	100 00	

Christians

Others

SECTION VI—RELIGION

34 The next point is religion which is treated in Imperial Table VI and the Supplementary Statement of the Population of the States by Religion on page 293. Of the total population of Central India 7 735 246 are Hindus 568 640 Musalmans 89 984 Jains 1 916 209 Aborigines 5 999 Christians 837 Parsis 1 825 Sikhs and 7 Jews. The census of 1881 gave 7 800 396 Hindus 510 718 Musalmans 49 844 Jains 891 444 Aborigines 7 065 Christians 916 Parsis 38 Jews.

35 The percentage of Hindus Musalmans Aborigines and Jains in 1881 and 1891 respectively is shown below—

	H d	M lman	J	Ab g l
1881	84.22	5.51	53	9.62
1891	74.96	5.51	87	18.57

36 The marked decrease in the number of Hindus is no doubt due to many Aborigines having been wrongly taken as Hindus in the census of 1881. The decrease in the number of Christians and Parsis is to be attributed to the abandonment of the Cantonment of Morar.

37 The following statement gives the percentage of Hindus Musalmans Aborigines Jains Christians and others for each Agency—

Ag y	H du.	M lman	Ab g l	J i	Ch t	O h
Indore	76.04	12.29	8.92	1.51	94	0
Gwalior	88.06	4.41	6.92	57	0	
Bhopal	75.29	8.04	16.80	53	01	02
B delkha d	89.17	3.62	6.29	83	04	0
Bagl elkhanda	67.39	2.51	30.04	02	01	
Western Malwa	71.79	7.80	18.6	2.06	05	03
Bhopawar	44.52	4.77	49.48	1.24		
Guna	82.48	3.74	12.24	1.42		10
TOTAL	74.96	5.51	18.57	87	05	02

38 The Table on page 305 illustrated by the diagram on the opposite page gives the percentage for States and for the places in British occupation (Cantonments Agency Head Quarters and the Pargana of Manpur).

SECTION VII—POPULATION BY AGE PERIODS

Age of the total population by 39 We now come to deal with the ages of the population. In Imperial Table VII seventeen

periods have been taken The statement below shows the total number of persons, male and female, returned as coming under each age period —

Age period			TOTAL	Males	Females
Under 1 year	.	.	294,188	148,599	145,589
1	.	.	156,064	76,725	79,289
2	.	.	260,260	126,476	133,784
3	.	.	318,639	151,142	167,497
4	.	.	316,752	158,123	158,629
5 to 9	.	.	1,497,365	782,080	715,285
10 to 14	.	.	1,103,466	641,130	462,336
15 to 19	.	.	784,898	430,680	354,218
20 to 24	.	.	870,602	431,257	439,345
25 to 29	.	.	947,316	481,576	465,740
30 to 34	.	.	1,032,901	543,758	489,143
35 to 39	.	.	1,621,937	335,734	286,203
40 to 44	.	.	775,259	411,970	363,289
45 to 49	.	.	309,606	173,162	136,444
50 to 54	.	.	457,459	233,392	224,067
55 to 59	.	.	117,450	62,133	55,317
60 and over	.	.	454,696	207,599	247,097

40 Some of these figures are very striking and even startling The number of children returned as one year old is little more than half the number of those returned as under one year. Assuming that the ages were correctly stated to the enumerators, this would indicate a most alarming rate of infant mortality, which is not borne out by any known facts At the same time it seems strange that a man, however ignorant, should not know whether his child was born more or less than a year ago Again, the number of children returned as one year old is only a little more than half the number returned as two years old

41 The statement below gives the percentage of Hindus, Musalmans, Aborigines and Jains coming under each age period —

Age period	HINDUS		MUSALMANS		ABORIGINALS		JAINS	
	Males	Females	Males	Females	Males	Females	Males	Females
Under 1 year	2 71	2 87	2 75	3 06	2 92	2 24	2 49	2 78
1	1 41	1 59	1 26	1 46	1 50	1 73	1 29	1 29
2	2 28	2 06	2 12	2 64	2 69	3 16	1 93	2 16
3	2 72	3 29	2 37	2 99	3 43	3 97	1 94	2 33
4	2 85	3 12	2 42	1 78	3 27	3 77	1 94	2 33

Age period	Male		Female		Total		Percentage	
	Male	Female	Male	Female	Male	Female	Male	Female
5 to 9	46	429	123	32	636	198	6	11.56
10 to 14	13	93	73	99	21	983	12.55	9.06
15 to 19	8	78	78	73	745	675	8.63	8.3
20 to 24	806	894	85	975	73	856	93	95
25 to 29	897	949	95	97	84	90	949	917
30 to 34	7	994	73	25	988	98	0.5	9.69
35 to 39	66	586	64	536	595	569	7.7	6.30
40 to 44	76	748	84	783	743	667	7.95	8.59
45 to 49	37	8	333	25	8	48	4.63	3.44
50 to 54	433	467	57	54	397	386	5.44	3.68
55 to 59	9	6	25	10	9	92	9	1.58
60 and over	385	56	485	57	348	48	4.53	5.86

42 In the 1881 Census five periods of age were adopted for Central India
viz — infants 1 to 3 years children 4 to 15 years
 youths 16 to 30 years adults 31 to 50 years old

Census of 1881
 above 51 years As regards this classification the writer of the 1881 report says —

It is a matter of extreme difficulty to invent any classification which while being intelligible to the educated native shall also effect a correct registration of ages. The periods adopted are probably a good day other than the common ones but they led to a belief in abnormal registration under the terms *children* (larkā larkī) and *youth* (javā). Moreover those who are not thoroughly old or crippled prefer to be recorded as *jawan* whilst a native boy may have reached the age at which he is no longer a child but is considered a man and still be called a *larkā* by his parent. The statistics of the whole population of Central India 6,102,298 have been recorded and the two denominations are 3,591,139 as youths 51,159 as children. The number of infants (from 1 to 3 years) is recorded at 869,890 or only 9 per cent the 2nd, 3rd, 4th, and 5th periods of age work out to 27, 40, 15 and 9 per cent respectively. Infants male and female are almost exactly equal. Male child 29 and females 25 per cent. Male youths and female 30 the number 39 and 38 per cent respectively. Male adults 15 female 16 old male 8 old female 12 per cent.

43 The following statement attempts to compare the results of the 1891 Census as regards the age of infants with those of 1881 by combining the two classifications —

Religion	1881			
	Male	Females	Male	Females
Hindu and Aborigines	907	98	742	845
Muslims	828	934	851	17
Jains	797	928	767	857

44 These figures are not very satisfactory. Comparison as to other age periods has been tried but with even more hopeless results it being impossible to adapt the classification of 1891 to that of 1881.

45. It is noticeable that in children under 4 years females are considerably more numerous than males. Between the ages of 5 and 29, and 30 and 59, males largely predominate, while females over 60 are far more numerous than males. These statements apply to Hindus, Musalmans, Jains and Aborigines both in this Census and in that of 1881. Among Hindus male infants under one year are more numerous than female. This was found to be the case both in 1881 and 1891.

SECTION VIII—CASTE

46. The subject of caste or tribe, in connexion with traditional occupation, is treated in Imperial Table XVI, the grouping being according to the scheme furnished by the Census Commissioner for India. This Table was a very difficult and costly one to compile, and it is questionable whether the result will be thought to be worth the trouble and expense. As regards the names of castes, the list may be accepted as complete, but whether they are correctly arranged in groups is another matter. A large number of castes, regarding the occupations of which nothing was known, have been thrown into group 45 (Miscellaneous and Disreputable Livings) miscellaneous they were, but doubtless they did not all deserve to be branded as disreputable.

47. Group 1 (Military and Dominant) contains 1,115,191 persons, or 10.80 per cent of the total population of Central India. Of these, 601,972 are described as Rajput, 204,501 as Gujar, 84,231 as Chhatti, 56,529 as Jat, 35,608 as Maratha, 37,757 as Deswal (Musa'man and Aboriginal), 24,241 as Rawat, 15,657 as Mirdha (Aboriginal), 14,724 as Thakur, and 14,399 as Raghubansi. The number of true Rajputs is, of course, much understated, many Rajputs having described themselves as Rathor, Rawat, etc. In the Baghelkhand Agency all the Rajputs seem to have been returned as Chhattis.

48. Group 2 (Minor Agricultural) contains 2,246,451 persons or 21.77 of the population. In this group the numerically strongest castes are the following—

Kachhi	472,124	Dhakar	47,260
Ahir	373,591	Tamboli	24,398
Balai	346,546	Kalota	20,703
Lodha	252,658	Mankar	19,766
Kurmi	164,117	Ajna	18,692
Koli	123,455	Dhanuk	14,516
Mali	91,365	Loda	13,971
Dangi	58,691	Sondha	10,097
Kunbi	57,884	Gaoli	10,042

49. The Kachhi caste is particularly numerous in the Gwalior and Bundelkhand Agencies, in the Indore Agency Kachhis number only 2,284. Of the Ahir caste 111,005 are found in the Bundelkhand Agency. The Balai caste is mostly in the Bhopal and Western Malwa Agencies. The Kurmi caste belongs almost exclusively to the Bundelkhand and Baghelkhand Agencies, while the Kunbi caste (probably the same as Kurmi) is found in Indore, Bhopal and Bhopawar. Gwalior has no Kunbis and very few Kurmis. The Dhakars are almost all in Western Malwa.

- 50 Group 4 (Forest and Hill Tribes) contains 1 409 868 persons or 13 66 of the population. The most numerous castes in this group are —

Bh l	354 177	Seheriya	70 004
Gond	254 449	Kotwar	28 335
Kol	217 274	Mewat	21 393
Bh lala	159 366	Ko ku	1 131
M na	118 518	Bharud	11 444
K ar	113 831		

51 There are 244 347 Bhils in the Bhopawar Agency and 79 077 in Western Malwa they are found in the other Agencies also but in Bundelkhand and Baghelkhand their number is very small. The Gonds are almost all in the Baghelkhand and Bhopal Agencies there are a few in Bundelkhand. Of Kols there are 210 045 in Baghelkhand and very few anywhere else. The Bhilalas were not separately enumerated in 1881 in 1891 they were. They are nearly all in Bhopawar. Minas are found in all the agencies. Kirars and Seheriyas belong almost exclusively to the Gwahor Bhopal and Guna Agencies. More than half of the Kotwars are in the Guna Agency. Mewatis are found everywhere except in Bundelkhand and Baghelkhand. The Korkus are nearly all in Bhopal. There are no Bharuds except in Bhopawar.

- 52 Group 5 (Priests) contains 947 741 persons or 9 18 per cent of the population. 945 475 are Brahmans.

- 53 Group 6 (Devotees) contains 14 917 persons or 1 38 per cent of the population. Bairagis number 58 986. Gosains 35 950. Gelots 20 879. Fakirs 12 759 and Jogis 10 274.

- 54 Group 14 (Traders) contains 369 947 persons or 3 61 per cent of the population. 60 784 are Banias and 14 930 Bohras.

The number of Banias is understated many of that caste being returned as Saraogi Baiswar Dasora Hasora etc. Of the Bohras 10 897 are in Western Malwa. There are 4 133 Mahajans and all of them in the Indore Agency have been returned as males probably the females have gone with the Banias.

- 55 Group 18 (Barbers) contains 182 47 persons or 1 76 per cent of the population. The only castes under this group are Bari Nai and Sirnai. The last named is found in the Western Malwa Agency alone and numbers only 628 persons. A few Nais are Musalmans.

- 56 Group 19 (Blacksmiths) contains 107 076 persons or 1 03 per cent of the population. 599 Lohars are described as Musalmans the others are all Hindus. The castes of Jotia and Kamar also appear among the blacksmiths but their numbers are infinitesimal.

- 57 Group 20 (Carpenters and Turners) contains 28 108 persons or 2 21 per cent of the total population. The Kathi caste numbers 85 430 the Sutar 83 987 the Barhai 43 789. Jaugars appear only in Baghelkhand and are all returned as females while the Barhais in that Agency are all males.

- 58 Group 23 (Weavers Calenderers and Dyers) contains 186 714 persons or 1 80 per cent of the population. The most numerous caste in this group is that of the Koris who however are almost all in Bundelkhand and Baghelkhand. The Panika caste is found only in Baghelkhand and is very numerous there. The Sali

caste numbers 13,691, almost all in Bhopawar The Chhipa caste exists everywhere in considerable numbers except in Baghelkhand

- 59 Group 26 (Shepherds and Wool Weavers) contains 182,089 persons, or 1 77 per cent. of the population, 171,332 are of the Gadaria caste This caste is found in every Agency

The Garī caste, numbering 3,226, belongs to the Indore Agency exclusively. The Gadri caste is found only in the Guna Agency, and of 803 persons belonging to it only 17 are returned as males.

- Group 27 60 Group 27 (Oil-pressers) contains 211,285 persons, or 2 04 of the population They are all of the Telī caste

- Group 28 61 Group 28 (Potters) contains 166,698 persons, or 1 61 of the population They are all of the Kumhar caste

- 62 Group 35 (Fishermen, Boatmen, Palki-bearers, Cooks, etc) contains 228,437 persons, or 2 21 per cent of the population

Group 35 The Kahar caste numbers 81,321 It is found in all the agencies, but there are very few in Indore, Bundelkhand and Guna The Dhimar caste numbers 69,429, almost all in Bundelkhand Kamkars (Musalman), 231 in number, are found only in Western Malwa, and are all females Kirs (Hindu), on the other hand, are all males in Guna

63. Group 38 (Leather workers) contains 958,121 persons, or 9 28 per cent. of the population In this group Chamars alone number 888,018, and are found in every Agency

The Bhami caste numbers 13,444, but there are none of this caste in the Gwalior, Bundelkhand or Guna Agencies The Mangi caste numbers 48,474, all in Baghelkhand.

- 64 Group 38A (Low Castes not included in Group 38) contains 16,775 persons This group has not worked out in a satisfactory manner, some of the abstracting offices

Group 38A having evidently included Dhers, Mahars and Mangs among the Chamars The figures of the Indore Agency are remarkable for the small proportion of females

- 65 Group 44 (Hunters, Fowlers, etc) contains 187,714 persons, or 1 81 per cent of the population The Moghya caste numbers 110,784, mostly in Western Malwa. The

Bagri caste, numbering 57,406, also belongs chiefly to Western Malwa The Pardhi caste numbers 6,291, mostly in Bhopal

- 66 Group 45 (Miscellaneous and Disreputable Livers) contains 163,900 persons, or 1 58 per cent of the population The

Group 45 anomalous composition of this group has already been remarked upon Besides those properly belonging to it, as Khangars, Baoris, Sondias, etc, it includes a large number of castes for which a proper place could not be found elsewhere In this group there is a caste called Savaya, in Guna 1,279 females are returned as belonging to it, and no males Of the castes known to be disreputable, the Khangar caste numbers 38,121, most of them in Bundelkhand The Sondhia caste numbers 8,044, almost all in Western Malwa The "others" in Indore are remarkable for the absence of males.

- 67 Group 48 (Tribal Communities of Foreign Asiatic Origin or reputed Descent) contains 455,102 persons, or 4 41 of the population In point of fact, this group includes a

large proportion of the Musalmans, who, in Central India are 5'51 of the total

population Among those included are 170 020 Pathans 234 789 Sheikhs 34 877 Sayyids and 10 124 Moghals These four tribes are well distributed over the Agencies Arabs number 134 of whom 100 are in Bhopal and the remainder in Western Malwa Sunni is a strange tribe for 28 Musalmans in Indore to fancy they belong to and equally strange is Shiah for 1838 in Bhopal Vilaitis so called number only 740 most of them in Western Malwa Sidis number 474 divided between Indore and Western Malwa Par is number only 837 almost all in Indore and Western Malwa

68 Group 50 (Non Asiatic Races) contains 4 154 persons The only noticeable point in this group is the French descent of 128 Christians in Bhopal who represent the Bourbon family which entered the service of the Bhopal State in the time of Vizier Mahomed They have decreased in number since 1881 having been returned then as amounting to 155

69 Group 51 (Eurasians) contains 1 535 persons It is doubtful whether the names under this group denote any real distinction of race In popular opinion Eurasians are the same as East Indians and the Portuguese that are met with in Central India are scarcely to be differentiated from the Goarese Group 52 (Christian Converts) contains only 310 persons Possibly some who ought to have appeared among the Christian converts have been included among the Madrasis of Group 51

SECTION IX —OCCUPATION

70 Tables XVII A and XVII B deal with Occupations the former being a Provincial Summary by ages and the latter showing the distribution of occupations over the different Agencies These returns were even more troublesome and costly to compile than the Caste Table and the information conveyed in them is at least as imperfect in points of detail Something will be said hereafter in connexion with the subject of tabulation about the untrustworthiness of many of the entries in the occupation column of the enumeration book and of course the abstractors could not make the registers more accurate than the data with which they were furnished

71 It will be noticed that the totals of the two tables do not tally This is due to the fact that the abstraction of the returns for the Tonk districts in Central India was done in the Rajputana Census Office and as that office elected not to abstract occupations by ages only the totals of occupations for those districts were sent to the Indore Census Office for compilation Those totals are included in Table XVII B but they could find no place in Table XVII A

72 The classification of occupations in these tables follows as closely as possible the scheme suggested by the Census Commissioner for India Of this scheme the main classes are—

A—Government

B—Pastoral Agriculture

C—Personal Services

D—Preparation and Supply of materials

E—Commerce and the Transport of Persons Goods and Messages and the Storage of goods

F—Professions learned art etc and music

G—Indefinite Occupations and Means of Subsistence independent of Occupation

73. Subordinate to these seven classes are twenty-three orders, as under —
- | | |
|--|---|
| <p>A { I —Administration
II —Defence
B { III —Feudatory State Service
IV,—Live-stock breeding, etc.
V —Agriculture
C, VI —Personal, household and
sanitary services
D { VII —Food and drink,
VIII —Light, firing and forage
IX —Buildings
X,—Vehicles,
XI —Supplementary require-
ments
XII —Textile fabrics and dress</p> | <p>D { XIII —Metals and precious stones
XIV —Glass, pottery and stone-
ware
XV —Wood, cane and leather
XVI —Drugs, gums, etc.
XVII —Leather
E { XVIII —Commerce
XIX —Transport and storage
XX —Learned and artistic profes-
sions
I { XXI.—Sports and amusements
G { XXII —Indefinite occupations,
XXIII —Independent of work</p> |
|--|---|

74. These orders are divided into seventy-seven sub orders, and in these sub orders are included nearly five hundred separate occupations.

75 The orders into which class A (Government) is divided are—

Class A	
I —Administration	76,025
II —Defence	17,151
III —Feudatory State Service	319,353

"Administration" contains 76,025 persons. But only 2,257 of those belong to the service of the Imperial Government, the total of the order being swollen by 73,678 persons in "Village Service," who would have been taken under "Feudatory State Service" had any place there been provided for them.

76 With regard to this class, it will also be noticed that it is only British troops which come under "Defence," those of Native States being included in "Feudatory State Service."

77 The two tables show a remarkable discrepancy under the head "Political Service," the one which includes the Tonk districts showing 116 persons belonging to that service, while the one which excludes those districts shows only 54.

78 The total number returned under "Feudatory State Service" is 349,358, of whom 115,581 come under "Army." No attempt has been made to distinguish officers from privates, the figures being in some cases utterly incongruous.

79 Adding the "Village Service" mentioned above to the total of "Feudatory State Service," we get the figure of 423,031, or 4.09 per cent. of the total population as depending on native state service for subsistence.

80 Class B (Pasture and Agriculture) contains 5,062,917 persons, or 49.06 per cent. of the population. These come under the two orders of—

Class B	
IV —Live-stock breeding, etc	97,177
V —Agriculture	4,965,740

81 The only two occupations under "Live-stock" that are numerous are—

Cattle-breeders and dealers	22,093
Herdsmen	49,560

82 As regards "Agriculture," the Census Commissioner's scheme made distinctions between tenants and occupants, and also between cultivating and non-cultivating tenants. The Enumeration Book used in Central India scarcely admitted of those distinctions being made, and when the Agency returns came to be compiled, it was found that several of the Agencies had not returned a single tenant, either cultivating or non-cultivating, and had taken all the persons coming under the sub-order "Interest in Land" as Land *occupants*. Similarly the sub-order "Agricultural Labourers" is blank for several of the Agencies,

Those who till the land have not been distinguished as occupants tenants or hired labourers the name *Kheti* being used for all three indifferently Enough has been said to show that though the total is no doubt fairly accurate no reliance can be placed on the details of the agricultural population

83 Class C (Personal and Household and Sanitary Services) contains 5 6 200 persons or 5 09 per cent of the population

Class C

Order VI of the same title is the only one under

this class and it includes personal and domestic servants of every kind and also all employed in connexion with sanitation as scavengers sweepers etc

84 Class D (Preparation and Supply of Material Substances) contains

Class D

1 38 492 persons or 13 45 per cent of the population These come under the under mentioned

orders —

VII — Food and Drink	2 8 227
VIII — Light Firing and Forage	108 259
IX — Buildings	75 170
X — Vehicles	509
XI — Supplementary requirements	34 819
XII — Textile Fabrics and Dress	330 857
XIII — Metals and Precious Stones	131 341
XIV — Glass Pottery and Stoneware	65 140
XV — Wood Cane and Leaves	154 318
XVI — Drugs Gums, Dyes etc	15 729
XVII — Leather Horns Bones and Grease	228 123

85 There are some very remarkable and inexplicable returns in this class In Baghelkhand there are 10 985 grain dealers all females 516 cocoanut sellers all males and 12 862 firewood and grass gatherers all males Similarly in Guna there are 1 375 country spirit distillers only 17 of whom are females and in Western Malwa there are 656 betel leaf sellers of whom only 9 are females In Indore there are 1 502 female brick makers and only one male A still more remarkable case is that of the building contractors of whom there are in all 213 males distributed over the Indore Bhopal Bundelkhand and Baghelkhand Agencies and no females anywhere

86 Under Textile Fabrics are shown a very large number of people (56 60) engaged in the preparation of cotton about half of whom are weavers

87 Under Leather etc appear 2 813 persons (Tanners Shoemakers Leather dyers Hide dealers etc) As the Chamars number 888 018 in the caste return either comparatively few of them adhere to their traditional occupation or else the name is used to cover many who do not properly belong to the caste

88 Class E (Commerce Transport and Storage) contains 308 24 persons or 3 04 per cent of the population These come under the two orders of—

XVIII — Commerce	273 433
XIX — Transport and Storage	34 809

89 As regards Commerce a very large number of persons come under the two designations of Merchants unspecified and Shop keepers otherwise unspecified There are of the former 54 482 and of the latter 136 101 These two represent the common entries of *Baipar* and *Dukandari* in the Enumeration Books

90 As regards Transport and Storage there has probably been considerable confusion between the Carts and Carriages of this order and the Vehicles coming under order X of Class D the latter are obviously fewer than they ought to be

91 "Pack bullock Owners and Drivers" number 9,860, while the caste return gives 58,904 Banjaras. This is a striking instance of a caste being forced by the march of progress to desert its traditional occupation.

92 Class F (Professions—learned, artistic and minor) is divided as under —

Class F
XX — Learned and Artistic Professions

XXI — Sports and Amusements

93 Under order XX, the ministry of religion accounts for 69,059, including such as priests, religious mendicants, temple servants, etc., 140 persons have been returned as Hail-aversers and 61 as Amuletiars.

Teachers and schoolmasters number 2,026, which seems a very small allowance, the males above 15 years of age, who may be supposed to be engaged in the work of teaching, being only 856, while the number of boys of school-going age in Central India is nearly a million and a half.

Medical practitioners of all kinds number only 4,804.

Under "Pictorial Art" come 2,299 Painters, but it is scarcely credible that there are so many in Central India following painting as a fine art. *Rangasars*, rather than *Musawwar*, would probably be found to be their real profession.

94 The total number of persons who come under "Sports and Amusements" is 6,930.

95 Class G (Indefinite Occupations and Means of Subsistence independent of Occupation) contains the following orders —

XXII — Indefinite 2,197,989

XXIII — Independent of work 276,709

96 The order "Indefinite" is swollen by 2,190,099 persons returned as subsisting by "general labour"—the *macduns* of the enumeration books. These amount to 21.22 per cent of the population. "Miners unspecified" are 1,128, all in Baghelkhand, and no doubt represent the persons employed in the Umaria collieries.

97 Among the "Independent of work" 269,187 are returned as "Mendicants (not religious)".

"Prisoners" are only 1,548, which of course is much below what it ought to be. It is evident that the inmates of jails have not in most cases been entered as such, but as of the occupation which they followed, or chose to say that they followed, when they were free. This appears particularly in the Bundelkhand Agency, for which no prisoners have been returned, and from the Bhopal Agency, where 238 are returned, but all females.

SECTION X—SPECIAL TABLES REFERRING TO CANTONMENT AND RAILWAY POPULATION

98 The under-mentioned tables have reference only to Cantonment and Railway population, enumerated on the British India Schedule. The figures are those received from the Ajmir Census Office, in which the Abstraction and Tabulation of these Schedules was carried out.

Table VIII — Population by age and civil condition.

Table VIIIA to Table VIII I — Civil Condition by Age for the different Religions—Hindu, Musalman, Jain, Aboriginal, Christian, Parsi, Sikh, Jew.

Table IXA to IX I — Education by Religion and Age.

Table X — Parent Tongue.

Tables XII to XVA — Infirmities (unsound mind, deaf-mutes, blind, lepers) by Age and Caste or Tribe.

99 The numbers prefixed to the caste groups in the infirmity tables are those of the Census Commissioner's classification of castes.

having a separate independent entrance from the public way (whether road, street, or lane, etc.) Special cases, such as enclosed quarters of towns, the quarters of low-caste menials outside the walls of the village, lodging-houses with galleries and outside stair-cases, the central house of a village, which not unfrequently forms a sort of fort full of the independent dwelling-places of relatives of the headman, all these require to be numbered under special instructions, as the definition fails to include them.

"Between October and January, the supervisors should be instructed in their duties, more particularly with reference to the schedule entries and the check upon the enumerators during the preliminary record. The best means of doing this is to organize a class of men sent up from each State for the purpose, who should be personally conducted round a block or a few houses by either the Political Agent himself, or some one specially trained by him in census details, so that a few spare schedules may be filled up by or in the hearing of the class of supervisors, who should be encouraged to bring forward any doubts or difficulties they may have chanced upon. Or, again, the instructing officer may depute one of these nominees to enumerate any person who may be in attendance in court or office on business, and correct and explain the record thus made. At all events, the men should be taught their work on some regular system, so that they in turn can teach the enumerators.

"The month of January should be taken up with the first round of the enumeration, on which he has to enter in his book the full details about all the ordinary residents in his block, by house-to-house visits. This round will be spread over from 15 to 20 days, and should be concluded by the 1st February. In towns, where the movement of the population is more frequent, it will be sufficient to begin on the 1st February, and finish on the 15th idem. During and after this record, the main work of the census in the direction of test and correction has to be performed, and this can only be properly done by house-to-house visitation. The mere inspection of a bundle of books brought by the enumerators or supervisors to a camp or office is necessarily only good for the correction of errors in the record, and leaves untouched the far more serious errors that may have occurred in the enumeration. Without expecting the same amount of check and inspection required in British territory, there is no reason why a considerable control should not be exercised in many parts of Central India by officials on tour, or when other opportunities occur. The preliminary record will not be made in cases where the enumeration is spread over some time, and not merely revised on a fixed date.

"The census itself will take place on the night of Thursday, the 26th February, and in Central India the towns and parts of the more thickly-populated country can probably be enumerated between nightfall and midnight on that date. In the rest of the tract, except certain hill and forest areas, it will apparently not be advisable to attempt more than a day-census, or revision of the preliminary record on the 26th and 27th. In the parts of the country inhabited by wild tribes, and very difficult of access, it is not practicable to take a synchronous census at all, so the enumeration will have to be effected by the aid of the tribal headman, beginning on a date to be fixed in consultation with the Agent to the Governor-General, according to circumstances, but ending with the 26th or 27th February.

"Copies of all circulars of a general nature issued by the Census Commissioner will be forwarded to the Agent to the Governor-General from time to time for information, so that the procedure in British territory may be learnt by those concerned with the operations in Feudatory States. It might be of advantage also to hold a meeting at Indore soon after the preliminaries have been started to discuss difficulties and arrange procedure. Probably the beginning of July would be a suitable time for such a consultation, and in addition to the Political Agents, delegates from the States, either the official specially entrusted with the local Census arrangements, or some one in general authority under the Durbar, might attend. The Census Commissioner hopes to be at Indore himself on this occasion, but if he is unable to be present, will obtain the sanction of a Local Government to the deputation of their Census Superintendent to attend the meeting and give his advice.

"In conclusion, it may be pointed out that with the record of 1881 as a basis for operations and the long period available on this occasion for preparation, the Census of 1891 should be taken not only with more ease, but also with considerable improvement in accuracy and despatch."

2 Mr Baines, Census Commissioner for India, made a flying visit to Indore early in March and went over the records of the 1881 Census to see what changes and modifica-

Census Conference at Indore

tions were desirable. He then arranged for a Census Conference to be held a few months later at Indore. Accordingly he again visited Indore in July and was met by almost all the Political Agents and by several officials who had been deputed by Native States for work in connection with the Census. At this Conference it was finally decided after elaborate discussion what the form of the Enumeration Book for Native States should be and various other points of Census administration such as the enumeration of wild tribes etc. were considered.

3 The Political Agents were informed that it was the intention of the Government of India to take a Census of the whole of India on the 6th February 1891 in which the Agent to the Governor General had no doubt that the Durbars and Chiefs of Central India would give cordial aid and co-operation as they had done in 1881. Intimation to that effect was to be at once made to the Durbars and guaranteed Thakurs under each Agency.

4 Full instructions based on the Census Commissioner's notes were issued to the Political Agents and the functions of the different officials to be appointed by the States to conduct the operations were clearly defined. Those officials were—(1) an Enumerator for each block (2) a Supervisor for each circle (of seven to ten blocks) and (3) a Superintendent for each town or Pargana.

5 Some difficulty arose as to the enumeration of the parts of Central India States that lie in Rajputana and *vice versa*. It was decided that the enumeration of the Chaumehla District of Jhalawar and of the Sironj Pirana and Chhabra Districts of Tonk should be conducted under the orders of the Rajputana political authorities by the Jhalawar and Tonk Durbars respectively and similarly that the enumeration of the parts of Gwalior and Indore in Meywar should be conducted by the Gwalior and Indore Durbars under the orders of the Political Agent in Western Malwa.

6 Certain villages belonging to the district of Allahabad lie within the Baghelkhand Agency. The enumeration of those villages was arranged for by the Allahabad authorities. Again several villages of the Rewa State lie within the district of Allahabad and several villages of the Nagode State lie within the district of Jabalpur. The enumeration of those villages was arranged for by the Rewa and Nagode Durbars respectively under the orders of the Political Agent in Baghelkhand.

7 As regards the enumeration of parts of States lying in different Political Agencies in Central India the instructions issued from the Indore Census Office were in accordance with the principle laid down by the Census Commissioner (see page 29). A difficulty was raised by the Political Agent in Bhopal who advocated what he considered a simpler system *viz.* that the enumeration of the detached portions of Gwalior, Indore, Dewas and Dhar lying within the Bhopal Agency should be conducted by the Durbars of those States. It was decided that the general rule should be followed in all cases.

8 Several States represented that their rights would be infringed if the enumeration of the Thakurats under them were taken by the Thakurs themselves under the supervision of the Political Agent but it was explained that the operations of the Census had no political significance and that no rights could be created, destroyed, strengthened or weakened by anything done in connexion therewith. In the case of any difficulty arising regarding Thakurs whose guarantee had been brought to notice since the Census of 1881, Political Agents were instructed to make a reference to the Agent to the Governor General.

9. As has been already stated, the Census Commissioner did not contemplate a synchronous enumeration for hill tribes. But Enumeration of hill tribes, etc in Gwalior it was found possible to enumerate those tribes in the same way as the rest of the population. In Baghelkhand the hill tribes were enumerated by day on the 26th and 27th of February. In the Bhopawar Agency, in which Bhils form the majority of the population, some trouble arose from a Brahman of Jhabua having started a theory that the object of the Census was to procure some men and children to bury alive in the foundations of a new bridge. Some Bhils were reported to have left the country in terror, but the Jhabua Durbar promptly had the Brahman arrested and punished, and the excitement soon subsided.

SECTION II FORM OF VILLAGE REGISTERS, INDENTS FOR ENUMERATION BOOKS FOR NATIVE STATES, CANTONMENTS AND RAILWAYS.

10 No special forms for house and village registers were prescribed by the Census Commissioner. The following were Form of village registers and house lists recommended for use in Central India, and were uniformly adopted —

Block List

Village	Sub division (Hamlet, etc)	Houses			REMARKS
		Serial No	Description— dwelling shop, temple etc	Name of chief occupant	
1	2	3	4	5	6

Village List

STATE		PARGANA			CIRCLE		
Serial No	VILLAGE		No or letter of Block	Serial No	Houses		REMARKS
	Name	Name of Hamlet Quarter etc			Description (dwelling houses, temple shop etc)	Name of chief occupant	
1	2	3	4	5	6	7	8

Nambar Makan

Nambar Shumar	Namme valadi- at	Mard ya Aurat	Umr	Mazhab ya Dharm	Zat ya Kaum	Jahan pradayish hui kisi riyasat ya kisi shata amaldari Sar- kar Angreze men	Pesha ya aur tarik guzareka
1	2	3	4	5	6	7	8

12 It was decided that 110 schedules should be bound in each book, each schedule being ruled for ten names, and that no variation from this rule should be permitted

13 Each book was complete with Instructions to Enumerators, a Specimen Schedule filled up so as to show the enumerators how to deal with the entries they were likely to have to record, an Enumerator's Abstract, the use of which will appear hereafter, and a Block List, as already mentioned.

14. The following is a translation of the Instructions to Enumerators.

INSTRUCTIONS TO ENUMERATORS

A —The First Round

You will visit each house in your block to which has been given a number corresponding with the block list and enter in the blank schedules the name and particulars prescribed below for every person, young and old, males and females, residing in or taking meals from that house. You should use a fresh page for each house, and when there are more than ten persons in a house, continue the entries on the next page, which should be numbered, with the addition of the word "continued" in brackets after the number. Do not begin the entries for a fresh house in the middle of a page. If any ordinary resident in the house be absent for a few days, you should still enter that person as present. If there are any visitors in the house who are only stopping a day or two, as for a marriage, etc., do not enter them, unless they are going to stop till the 26th February. Write very clearly in the character you know best. Enter first the head of the family in each house, whether male or female, then the rest of the members of the family, then the servants residing on the premises, and lastly, visitors who are likely to stop some time in the house.

B —The Second Round

On the evening of the 26th and the morning of the 27th of February you will again visit your block, as before, and read over to the head of each family the entries made on your first visit, and ask him if any person has left the house, or any one has come who was not there before, or if any infant has been born. You will then enter those not entered before, and strike out the whole of the entries for those who have died or have left. But if any person has only left the house for a few hours to watch in the fields, etc., and is still taking meals from the house, you will consider him as present, and not strike his name out. After visiting all the houses, go to the dharamsalas, serais, and landing or encamping places, and count all the travellers, pilgrims, etc., you find there. When you are sure that every part of your block has been thoroughly visited, you should go to your Supervisor, and prepare the Abstract.

C—Rules for filling in the Schedule

Column 1—(Serial number) Do not enter this number on your first visit but fill it in on your second round

Column 2—(Name) If a child had not been named enter the word child Enter all persons by name but if there is any objection to giving the name of any female enter the word 'Female' in this column

Column 3—(Sex) Enter whether each person is *male or female* even though you have already written female in column 2

Column 4—(Age) Enter the number of years each person has completed—and in the case of infants of less than one year old write the word infant in this column If the age cannot be stated exactly guess what it is from the appearance of the person or by inquiries from relatives You must not however ask to see any female who is not voluntarily presented before you

Column 5—(Religion) Enter whether Hindu Mussalman Jain Christian Parsi Bhil etc

Column 6—(Caste) Enter the caste of Hindus as Brahman Rajput Bania etc the tribes of Mussalmans as Saiad Shaikh Borah Pathan Arab etc and of forest tribes as Bhil Gond etc and the races of Christians as European Eurasian Native Christian

Column 7—(Birth State or Province) Enter the State or if born in British Territory the Province of birth but not the zillah parganah village or town

Column 8—(Occupation etc) Enter the occupation of all who do work and in the case of young children and women who do no work for wages etc enter the occupation of the person who supports them prefixing the word *dependent* as agriculture State military service State writers private service trade (as shop keeper money lender etc) priest artisans (as carpenter gold smith weaver potter etc) labourer and mendicancy You are not to leave this column blank even for infants as these are supported by their parents whose occupation is to be entered against the name of the infant as above prescribed

Note—Do not write the word ditto in any column and make a full entry as above prescribed in every column for every person whether infant or grown up

15 The following is the English version of the Specimen Schedule —

Ho se No

{

(Signed)

(Signed)

*Charge Superintendent**Supervisor*

19 It was arranged that both Urdu and Nagari versions of the book should be printed. The Nagari version was an exact transliteration of the Urdu

20 In Cantonments and Agency Head quarters the Census Commissioner Form of Enumeration Book used decided that the fourteen columned schedule of for Cantonment & British India should be used for the enumeration of both the civil and the military population. These schedules were bound 104 in a book but loose* (or household) schedules were also provided and were freely used especially at Mhow

21 In the Cantonments in which British troops are stationed (Mhow, Nimach and Nowgong) there is the civil authority of the Cantonment Magistrate co-existing with the military authority. In those Cantonments the enumeration within military limits was taken by the military authorities while the enumeration outside strictly military limits was taken by the Cantonment Magistrates under instructions from the Political Agents. The Census Commissioner was at first inclined to think that Mhow was a special case and that it would probably be necessary to have all the census arrangements for Mhow controlled by the General Officer Commanding but it was afterwards decided to treat Mhow in the same way as the other Cantonments.

Agar, Guna, Sehore and Sardarpur are Cantonments for Local Corps and are all Agency head quarters also. At Agar and Guna the military and civil authority is the same the officer in command being Political Agent also. As such he took the census of the whole population both military and civil. At Sehore the officer commanding the Bhopal Battalion took the census of the military lines and the Political Agent took the census of the civil population. The same course was followed at Sardarpur. For Mahidpur which used to be a cantonment it was thought advisable that the arrangements for its enumeration should be made by the Political Agent in Western Malwa.

23. The Agency Head-quarters which are not also Cantonments are Indore Residency, Gwalior Residency, and Sutna (Baghelkhand). In these the enumeration was of course conducted by the Political authorities. No special arrangements were considered necessary for the small detachments of troops stationed in them, except that the company of British infantry and the wing of Native infantry stationed at Indore were enumerated by the officer commanding the station under instructions from the General Officer commanding the Mhow Division.

24. For the enumeration of Railway population also the fourteen-column schedule was used. All the arrangements were made by the Railway authorities, the only thing done by the Indore Census office being to prepare, and send to the managers of the different railways, mileage statements, showing the length of line in each Agency. The total mileage of railways in Central India is 823.50 miles, distributed as in the following table —

Rajputana-Malwa Railway	{ Indore Agency	73 16
	{ Western Malwa Agency	151 65
Indian Midland Railway	{ Bhopal Agency	123 00
	{ Bundelkhand Agency	65 46
	{ Gwalior Agency	66 35
East Indian Railway	{ Bundelkhand Agency	68 38
	{ Baghelkhand Agency	87 00
Bengal-Nagpur Railway	. Baghelkhand Agency	188 50
TOTAL MILEAGE		823 50

25. No record having been kept of the population of villages according to the Census of 1881, the preparation of the indent for Enumeration Books for Native States of books required for the enumeration of Native States was a very difficult and tedious task. It is to be hoped that it will be found possible to preserve, in manuscript at least, if they cannot be printed, the village registers of the 1891 Census. The preliminary arrangements for the next census will be much simplified thereby.

26. All the enumeration books for the Native States of Central India were printed at the Government Press, Calcutta.

27. The instructions of the Census Commissioner were that an indent for the books required, prepared on information received from the Political Agents, should be forwarded not later than August 1890. The Political Agents were instructed to base their calculations on the number of houses to be covered by the Census operations, if sufficient information was available, if not, their indents were to be made out as accurately as possible on such information as could be collected at an early date, on the basis, not of the population as estimated by the previous census, but of existing and ascertainable facts, bearing in mind that each enumeration book was to serve for the dwellers in not more than 100 houses.

28. It was arranged that both Urdu and Nagari books should be provided, the Nagari version, as already explained, being a literal transcription of the Urdu.

29. The indents of all the Agencies reached Indore in time to enable the Indore Census Office to forward the indent for the whole of Central India on the 18th of August, and to make timely provision for correcting the few miscalculations that were unavoidable.

Indent for the eight columned Enumeration Books of 10 pages each required for the Native States in the Central India Agency

Agency	NUMBER OF BOOKS	
	Head	Under
Gwalior Residency	7310	
Bhopal Agency	4675	1100
Bundelkhand Agency	471	275
Baghelkhand Agency	7700	
Western Malwa Agency	7301	660
Bhopanwar Agency	4750	
Guna Agency	1655	15
Indore Agency	1990	
TOTAL	40093	2050

30 It having been arranged that the abstraction and tabulation of the Indent for Enumeration Books books used in the census of Cantonments and Agency Head quarters and of European residents in Native States should be done at Ajmir it was ordered that the indents for those books should be forwarded by the military authorities and (for the civil population) by the Political Agents direct to the Provincial Superintendent of Census at Ajmir

Indent for Enumeration Books and Household Schedules required for Cantonments and Agency Head quarters in Central India

31 The Indore Census office had nothing to do with the indents of books for the enumeration of the Railway population in Central India. Those indents were prepared by the authorities of the different railways, and forwarded by them to the Provincial Superintendents of Census to whom respectively it fell to take the census of those parts of the different lines that lie in British India. Thus, the indents for the Indian Midland and East Indian Railways were sent to Allahabad, that for the Bengal-Nagpur Railway to Nagpur, and that for the Rlyputana-Malwa Railway to Ajmir.

SECTION III—ARRANGEMENTS MADE BY DURBARS FOR CARRYING OUT THE ENUMERATION IN THE VARIOUS STATES

32 So far the report has dealt almost wholly with the Census Commissioner's instructions for the census of Central India, and their communication through the Indore Census office, to the Political Agents. It will be advisable at this stage to say something of the way in which those instructions were carried out, so far as may be gathered from reports received from the Political Agents, and from the Durbar Census officers appointed in the larger States. As the Indore Agency Census office was in direct communication with the Indore and Dewas census officials, a good deal of information exists for those States, and a very exhaustive and interesting report on Census operations in Gwalior was furnished to the Resident by the Chief Census officer of the Gwalior State.

33. Mr Krishnarao Gopal was appointed Chief Census officer for the Indore State. On his transfer to the interior he was succeeded by Messrs. K. S. Date and Fatch Singh as joint Census officers.

34 The work of enumeration in the Indore State was mainly carried out by official (unpaid) agency. Amins and Wahi-watdars were made Charge Superintendents, and Thanadars, Kotwals, and superior clerks were made Supervisors. A very few paid enumerators were employed as a rule, Patwaris, Kanungos, Mandlois, and the clerks of Jagirdars and Ijaradars were made to act in that capacity. Not reckoning the amount paid in travelling allowances to State servants, the enumeration is understood to have cost the Indore Durbar Rs. 4,000.

35 The first thing done was to prepare a list of the villages in each pargana, and to divide those villages, and also the mohallas of towns, into blocks consisting of not more than 100 houses each. Then village registers were prepared on a Hindi version of the form given on page 32. The registers, with full marginal instructions for filling them in, were printed by the Durbar. Specimens of these registers were brought to the Indore Census office for inspection. Then the houses were numbered, care being taken that no house was omitted.

36 In Indore, as elsewhere, some difficulty arose regarding the definition of a house. That adopted by the Agra Conference ("the dwelling-place of one or more families with their resident servants having one principal entrance from the common way") could not be universally applied. For instance, there exist in Indore walled enclosures with only one entrance from the common way, but with several separate dwelling-places inside, the one behind the other, those behind being reached by the verandah of the front one. It was a question whether one number should be affixed to the entrance from the common way, or all the houses within the enclosure should be numbered. The latter course was adopted, as giving the actual number of houses more correctly. Other questions as to what should

and should not be taken as houses were considered on their merits special instructions being issued to meet special cases

37 Blocks made by the district authorities to consist of more than 100 houses were remodelled. No block was allowed to contain parts of two separate villages. The whole of the Indore territory under the Indore Agency was divided into 68 circles and 672 blocks.

38 As soon as possible specimens of the Native State enumeration book as approved by the Census Commissioner were supplied to the Census officers of the Indore State that they might instruct the Charge Superintendents in the proper method of filling in the entries who in their turn might impart this knowledge to the Supervisors of whom there was to be one for every ten or twelve enumerators. To make sure that they thoroughly understood what they had to do Charge Superintendents were required to send specimens of filled in schedules to the Indore State Census officers for inspection.

39 The joint Census officers made a tour in the districts under the Indore Agency to see that the local arrangements were being properly carried out.

40 A great part of the work of the preliminary enumeration was done before the 10th of February on manuscript books specially prepared, to lessen the chance of the printed books being soiled or torn. The entries in the manuscript books were supposed to be copied into the printed books after the former had been inspected by the Charge Superintendents but it is doubtful if this inspection was made though strict injunctions were issued that it should be. If the inspection had been made it is scarcely possible that so many omissions should have been found when the books came to be abstracted.

41 The Census officers of the Dewas State (Senior and Junior) received instructions direct from the Indore Agency Office in the same way as the Indore officers did. Practically the same arrangements as those described above were carried out. A wrong system of numbering houses was in some cases adopted. Where several families occupied what would by the Census Commissioner's definition be one house a house number was given to each family. This mistake was found out too late to be rectified and must to some extent vitiate the return of occupied houses. The Dewas territory under the Indore Agency was divided into 64 circles and 293 blocks.

42 The Thakur of Bagli took the census of all his villages guaranteed and the non guaranteed under instructions from the Indore Agency office. The Thakurat was divided into 9 circles and 40 blocks. No paid agency was employed in Bagli. The four villages which the Thakur of Pathari holds under Dewas (Junior Branch) are guaranteed while the eight which he holds under Dewas (Senior Branch) are non guaranteed. The Dewas Durbar (Senior Branch) wished to take the census of the latter as had been done in 1881 but the Agent to the Governor General ruled that the Thakur of Pathari should take the census of all his villages. Similarly the Thakur of Uni was allowed to take his own census in spite of objections raised by Dewas (Junior Branch). So also was the Thakur of Karodia who holds under Indore.

43 The Neoni and Bhaurasa Parganas of Gwalior were divided the former into 19 circles and 63 blocks and the latter into 13 circles and 37 blocks.

44 As was remarked above a very full account exists of the census arrangements in the Gwalior State and particularly in those parts of the State that are immediately under the Resident, in the very able report made by Mr. Raghunath Rao Dinkar the Chief Census officer appointed by the Council of Regency. The following

sketch of census arrangements in Gwalior is in the main an abstract of Mr Raghunath Rao's report

45. Gwalior territory as a whole consists of three Prants —Gwalior, Malwa, and Esagarh. These are sub-divided into districts or zillas, and the zillas into parganas. The Suba is the chief officer in a district, and the Tahsildar in a pargana. The Malwa Prant is under a Sar-Suba.

46. The original intention was that Mr Raghunath Rao should direct the Census operations in the whole of the Gwalior State. But this arrangement was afterwards modified for reasons of convenience, and a special Census officer was appointed for Malwa, while the Subas of Esagarh and Bajrangarh were directed to make their own census arrangements under the instructions of the Political Agent at Bhopal and the Political Assistant at Guna respectively. The pargana of Esagarh* (with Chanderi), though under the Bhopal Agency, was, on account of its distance from Bhopal, taken along with the Gwalior Prant.

47. For census purposes the pargana was taken as the territorial unit, and divided according to the chaukis of head constables, these police divisions being better defined than the Kanungos' circles of the Revenue Department. A list of the villages under each chauki was drawn up by the officer in charge of the chauki, acting under the orders of the Tahsildar. To help and check the work of the Tahsildars, a Superintendent was appointed for each district.

48. Some irregular arrangements had been made, under the orders of the Political Agent in Bhopal, before the transfer above referred to was effected. In particular, the number of houses to be included in a block had been fixed at 36, while the enumeration books were intended for 100 houses. This of course seriously affected the indent for books, but it was thought too late to interfere with the arrangement already made, and it was allowed to stand.

49. The records of the 1881 Census, preserved in the Khatut-daftar, were not complete or accurate enough to furnish, even approximately, the number of houses to be censused in 1891, a fresh list of villages was necessary. Patwaris were made to send statements for their villages to the head constable of their chauki. These statements gave the name of each separate collection of houses (Thok or Tola) in the village, and the number of houses in each, and stated the description of the village, i.e., whether it was khalsa, maafi or jagir. The puras belonging to a village were also entered.

50. From these Patwaris' statements each head constable prepared a list of the villages included in his chauki, and for the accuracy of all the entries in this list the head constable was held responsible. From these head constables' lists, the list for the pargana was prepared by the Tahsildar. In this list only the name and description of the villages, and the number of houses in each, were given. One copy was sent to the Suba of the district, and another to the central Census Office at Gwalior, the latter having to reach its destination before the 5th of September. Each Tahsildar had to attach to his list a copy of the Topographical Survey Map for his pargana, on which he had marked the census area under each head constable, had entered in their proper place all villages not given in the map, and had drawn a red circle round villages that had been deserted, or had fallen under foreign jurisdiction.

51. The Tahsildars' lists when received were compared with the Dehzhada in the Mal-Daftar, and finally a correct list of villages in Gwalior Prant and Esagarh Pargana was secured. They were found to amount to 5,632, or, deducting 942 deserted villages, 4,690.

* Esagarh is the name of a Prant as well as of a pargana.

Gwalior—
contd

56 From these lists each head constable had to draw up a list of blocks for the area of his chauki in the following form —

Serial number of Village	Name of Village	Nature of Village	Number of Circle	Serial number of Blocks	Description of Blocks	Name of Enumerator	Office	Name of Supervisor	Office
1	2	3	4	5	6	7	8	9	10

A similar list of blocks was drawn up for towns

57 From these head constables' lists, each Tahsildar had to make up a list of blocks for his pargana, and forward it to his Suba and to the Chief Census office at Gwalior. The pargana lists all reached Gwalior in the month of October

58 The work of numbering houses was done in villages by the Patwaris, and in towns by the Sub-Inspectors of Police, assisted by the Patwaris of the towns and the Thana Moharrirs. Head constables had to visit all the villages in their chaukis twice, once to see the work begun, and again to see that it had been properly finished. The numbering was consecutive for the whole of a village and the puras attached to it, and, in towns, for the whole of a mohalla, or other town division. In Lashkar city the work of numbering the houses was supervised by the Thanadars, and by the Kotwals in Morar, Gwalior, and the quarter known as Maharaja Sindiah's Brigade.

59 After the numbering was completed, lists of blocks were prepared by Tahsildars (from lists furnished by the Patwaris) and forwarded to the Gwalior Census office. These lists were in the following form —

Serial number	Name of village, with description of block where the number of houses exceeds one hundred	Number of houses in each block
1	2	3

Lists of the blocks into which towns were divided were made on a similar form

60 It would have been easier to have had the houses numbered first of all, and the reason why that was not done was that the Gwalior Census Officer wished to make it imperative on the most careless Patwari to go three times round every house in his village—first for the preparation of the village list, second, for making rough circle and block lists, and third, for actually numbering the houses.

61 The Tahsildars' lists were revised in the Gwalior Census office, and blocks and circles not in accordance with the instructions were remodelled. As finally demarcated, there were, in Gwalior Prant and Esagarh Pargana 4,978 blocks and 585 circles.

62 It would seem that in 1881 the census was taken in Gwalior without any numbering of houses, for it is stated that this being done *for the first time*

in 1890 gave rise to fear among the ignorant villagers that a new and unheard of tax was about to be imposed

63 For preparing village lists demarcating blocks and circles and numbering houses the state officials did all that was required. As we have seen these were in the descending scale Tahsildar Sub Inspector or head constable and Patwari. But for the actual work of enumeration preliminary and final special agency was considered necessary. The Revenue Department it appears does not provide a Patwari for every village sometimes one Patwari has to manage a group of even large villages. The zamindars in the districts are generally illiterate and the respectable and fairly educated residents in the villages were found in most cases to be so hostile to the operations of the census that no useful aid could be expected from them. For these reasons the Council of Regency was induced to sanction a large amount of paid agency.

64 But the difficulty did not end with this. When the Tahsildars were told that they were authorised to entertain such and such a number of paid enumerators they replied that a sufficient number of competent men could not be got for money. Ultimately the responsibility of finding a sufficient number of fit men was thrown on the Subas of districts. About half the total number of enumerators were paid. In Lashkar and Morar no unpaid agency whatever was employed.

65 Each enumerator was provided with a card of appointment.

66 The census arrangements above detailed were held to cover lands held by the Government in jagir and the Inamdars were not as a rule asked to concern themselves with them. The three great Jagirdars however Jadhoo Sahib Sitole Sahib and Angre Sahib were asked to arrange for the census each of his own jagir and they gladly undertook to do so. Their arrangements however were carefully supervised by the Tahsildars in whose jurisdiction the jagirs severally lie. The Rajas of Pahargarh and Seopur Baroda and the Thakurs of Khatoli and Bhainswari objected to the Durbar authorities making census arrangements on their lands and claimed a right to send their census returns direct to the Resident. Their objections and claims were valid according to the ruling of the Agent to the Governor General for the census of guaranteed estates that ruling being in accordance with the general practice in the Census of 1881 and the abovementioned Chiefs were allowed to make their own census arrangements for their holdings.

67 It was decided to procure the enumeration books from the Government of India in preference to printing them at the Durbar Press. Loose schedules, locally printed were provided for the enumeration of travellers boatmen and wandering tribes. All the books and schedules were in Hindi and no other language than Hindi was to be used in filling them up.

68 The census of railway premises and travellers by rail was of course arranged for by the Railway authorities but that of outlying gate lodges etc was left to the local census officials. Thirty five enumeration books of 12 schedules each were procured and distributed to the enumerators of the villages within the boundaries of which the gate lodges lay. These books were ordered to be sent when filled in to the Resident for transmission to the Railway authorities.

69 The rules for the census of cantonments and troops on the march were modelled on those prescribed for British India. Loose schedules seem to have been largely used in the military Census.

Gwalior -
contd

70 There is not much river traffic in the Gwalior Prant, but it was thought advisable to take precautions to secure the inclusion in the census of persons in boats or at landing ghats on the census night. A policeman was stationed at every ghat on the night of the census to enumerate the people encamped on it, or sleeping in boats moored near. This was done on loose schedules, which were afterwards stitched to the books of the villages adjoining.

71. The police were entrusted with the census also of the houseless population. The station officers were furnished beforehand with as many loose schedules as they thought would be required for the camps within their jurisdiction. Precautions were taken to keep the camps stationary for some days before the census. The schedules were afterwards stitched to the village books.

72 Adequate arrangements were made for the census of other travellers. Officials on tour took the census of all persons attached to their camps. The population of such camps was included in that of the villages within the bounds of which they were pitched on the night of the census. People attending fairs or marriage festivals were enumerated by the police on loose schedules. Head constables were required beforehand to procure, and furnish to Subas, all the information they could regarding fairs and important marriages that would be likely to bring many people together on the night of the 26th of February. The schedules were attached to the books of the villages at which the gatherings were held.

73 For the census of the Lashkar jail, arrangements were made by the Suba of Gird Gwalior, within whose jurisdiction it lies. For the district jails no special arrangements were considered necessary; they were taken as parts of ordinary blocks. Hospitals were treated in the same way. No preliminary enumeration was made in jails and hospitals.

74 Having regard to the inefficiency of many of the Patwaris, and also of the paid men employed as enumerators when Patwaris were not available, it was considered necessary to begin the preliminary record a full month before the actual census. On the 15th of December, State servants were selected by the Subas from the different departments to act as Supervisors, and on the 28th such paid enumerators as were required were appointed. Each supervisor, on his appointment, received from his Charge Superintendent the enumeration books for his circle, and also a copy of the circle and block lists.

75 The method of filling in the entries having been fully explained to them, the enumerators were made to enumerate the inhabitants of ten houses on a manuscript copy of the schedule. Their entries were submitted to the Supervisors for inspection. The block lists were then copied by the enumerators into the pages provided for the purpose in the enumeration books, and the enumerators started on their first round, to make the preliminary record. For this manuscript books were used, the entries in which were not copied into the actual census books till they had been scrutinised by the Supervisors. For houses found unoccupied on the first round enumerators were directed to write "empty" on the top of the schedule, and leave the page blank.

76 In no part of Gwalior Prant and Esagarh Pargana was it considered necessary to arrange for a day census even of wild tribes.

77 The final enumeration on the night of the 26th of February was fixed to begin, in the districts, at sunset. In Lashkar, Morar, and Gwalior 9.30 P.M. was fixed, in order that persons arriving by the mail train from Agra might have time to reach their homes.

8 Lashkar city being for police purposes separate from the Gird Gwalior district in which it lies was taken as a census division by its H and the census officers held clerk was intrusted with all the arrangements for the nine thanas into which it is divided Enumerators were engaged for a month on P8 and durbar officials were made to act as Charge Superintendents and Supervisors

9 To guard against difficulties that might arise from the ignorant prejudices of the people, the following notification was published by the Durbar

Notification

In any of the following uses namely —

- (a) If any Cens officer wtho t^l sufficient ca^{se} ref^{ses} or n^{eg}lects to act as such or makes any f^{alse} return
- (b) If any person r^{efu}s to answer any q^{uest}ion asked of him by a Cens officer
- (c) If any person occupying any hou^{se} en^{cl}os^{ed} or other place r^{efu}s to allow acc^{ess} to any Cens off^{icer}
- (d) If any per^{son} er^{rors} ob^literates alters or injures before th^e 31st d^{ay} of March 1891 any n^{um}bers which ha^{ve} be^{en} aff^{ix}ed to ho^{use}s
- he sh^{all} be puni^{shed} w^{ith} f^{ine} wh^{ich} may ext^{end} to fifty rupees.

80 It was estimated that the census of the Gwalior Prant would cost Rs 58,56-9 divided as follows —

Number	Head of Charges	Rs	Annas	Paisas
1	Genl office allowance	2,00	0	0
2	Office Establishment	2,933	9	0
3	Pay of Sepoys dist for 7 d district	2,730	0	0
4	Pay of Interpreters	19,432	0	0
5	Maps n Hindi	240	0	0
6	Sepoys in La Bazar city	400	0	0
7	Print g numbers on lous	272	12	6
8	Stationery	645	1	0
9	Miscellaneous	229	15	6
	TOTAL	9,583	6	0

[illegible]

31 M F Rk th F D1 1 f 1

The report is generally very satisfactory.

It is a matter of regret that some people may not have received the district and village level. The literate people paid RS per month. The total not be paid a great number of people to be RS 232.

It is not said whether the book applied for the usual outlying gate-lodges the way are
of the four enclosed kind as they ought to be. They are of the highest quality; so it
is presumed that they will look well. Specimens will have to be taken that the enumerator will
with different books than the New State book.

Objection might be taken to the prescribed schedule for the enlistment of troops from the march of boatmen etc., I do not think it right that the 26th February of the houseless population and if we can attend to the needs of our people. The schedule for the enlistment of troops from the march of boatmen etc., I do not think it right that the 26th February of the houseless population and if we can attend to the needs of our people.

81. To give in detail the census arrangements made by the other important States in Central India would be in effect, a repetition of what has been said above regarding Indore and Gwalior. So far as information is available, it appears that effective arrangements were made in all of them under the direction of the Political Agents concerned.

82 As regards Rewa, no trouble was anticipated in taking the census of the wild tribes inhabiting its more remote districts, but, in accordance with the instructions of the Census Commissioner for India, those tribes were enumerated by day on the 26th and 27th of February

SECTION IV—COMPILATION OF RETURNS BASED ON THE ENUMERATOR'S ABSTRACT

83 After the actual enumeration on the 26th of February, and before the enumeration books were sent in to the Agency Head-quarters, the page in the enumeration book called the enumerator's abstract had to be utilised for the compilation of a rough return of occupied houses, and of the numbers of the population, urban and rural, by sex. This return was meant, in the words of the Census Commissioner, "not only to serve as a guide in abstraction, but for use in official returns for the year ending with the 31st of March 1891."

84 That urban and rural areas might be clearly distinguished for the purposes both of this return and of the subsequent tabulation of the census figures, Political Agents were required to furnish beforehand lists of places which should for census purposes be considered as towns

85 Regarding the compilation of returns based on the enumerator's abstract the following circular was issued to Political Agents

Instructions for the compilation
of enumerator's abstracts

"It is presumed that everywhere Census officers have been or will be soon appointed according to the Census Commissioner's instructions. These officers are Enumerators, Supervisors, and Charge Superintendents. The function of each in the preparation of the abstract is as follows—

1stly—The Enumerator under the immediate eye of his Supervisor is to add up the number of (a) occupied houses, (b) males, (c) females in his block. The form adopted for Central India will not admit of visitors being shown as distinct from residents. Then the supervisor is to pass the book over to another enumerator for re-addition, and if the figures thus totalled tally with each other, the abstract form on the reverse of the specimen schedule in the book is to be filled in and signed by both the enumerators, and certified to be correct by the Supervisor.

2ndly—When this has been done the Supervisor should proceed to enter the results in the *Circle Abstract*, which will be supplied to him in a form somewhat modified from that sketched in paragraph 3 in Note L, of date the 18th July 1890 from the Census Commissioner, India, and which he is to sign.

3rdly—The Supervisor is to take his *Circle Abstract* to the Charge Superintendent who will be Chief Census officer in a pargana, town, or zilla, etc, who is to post the circle totals in to a *Summary* for his sub-division in the form shown in the annexed separate paper and pass it on after being satisfied of its correctness, to the Political Agent through the proper channel.

4thly—The last thing to be done is for you, as Political Agent, to prepare an Agency Summary according to the form suggested in paragraph 5 of the note, including the totals for Cantonments and Railways, and to wire the results to the Census Commissioner for India, Simla, and to this office in the following concise form "Houses , Males , Females , Total ." You will be separately addressed regarding the despatch to you of the summaries of Cantonments and Railways.

You are further required to prepare a statement in the following form —
(Agency)

Name of Town etc.	Total Population	Census Registration Area	Occupied Houses	Persons			Remarks
				Males	Females	Total	
Town A							
Cantonment A							
Town B etc							
TOTAL Towns							
B Total Rural areas							
Grand Total							

and transmit it by post to this office as well as to that of the Census Commissioner for India Simla. To prepare this statement it will be necessary for you to decide in consultation with all the State officials on the principles laid down as under what places are to be regarded as towns for census purposes.

(a) The population should be not less than 5000 residing in houses more or less contiguous not in scattered collections hamlets etc.

(b) The place though containing the above population should not be merely a large village but should have some distinctly urban character as that of a market town.

A list of towns in your agency should before the census be submitted for record to the Census Commissioner for India Simla and also to this office.

It has been arranged to have extra copies of the Enumerators Abstract printed on separate slips of paper in case those in the book become torn or dried and these will reach you direct from the Press. They should be distributed to the Native States in your agency in proportion to the number of books issued by each.

It has also been considered necessary to have the form printed for the Circle Abstract and Sub-divisional Summary in Hindi and Urdu and the Agency Summary in English. I am therefore to request that you will report at an early date the number of these forms which will be required in your agency. There should be no difficulty in arriving at the required number as the Circles and Sub-divisions are or should be marked out already.

CIRCLE ABSTRACT

State	Pargana Town Zilla etc			Circle		
Village or ward of town	Block No.	Number of occupied houses	Males	Females	Total

Pargana, etc., Total					

Tested and submitted through
on the 1891. *to the Political Agent*

(Sd)

NOTE.—The Agency Summary will be in exactly the same form as the Summary, the first column being reserved for Parganas, etc

86 The civil and military authorities in cantonments were similarly addressed as to the preparation of circle summaries and a sub-divisional summary for each cantonment, which latter was directed to be forwarded to the Political Agent concerned. A similar summary, also to be sent to the Political Agents was ordered to be prepared by the Railway authorities for the parts of their lines lying within the limits of each Agency

87 The Agency summaries were in all cases to reach the Census Commissioner by the 8th of March, the totals being telegraphed to him not later than the 5th. The State returns were prepared with as much accuracy, and forwarded with as much punctuality as could reasonably be expected

SECTION V—ABSTRACTION AND TABULATION

88 For the tabulation of the Census Returns of Central India the following five registers were adopted —

TABULATION REGISTER No 1

All Religions			RELIGIONS												
			State					Pargana							
Serial No	Villages	Block No	MALES						FEMALES						
			Hindus	Mahomedans	Jains	Aboriginals	Parsis	Christians	Jews, etc	Total males	Hindus	Mahomedans	Jains	Aboriginals	Parsis

Size 2' 3" by 7½"

In this Register Jains and Aboriginals were shewn separately from Hindus as in the Abstraction sheet, and Aboriginals included Bhils, Gonds, etc,

90. An important preliminary to the work of abstraction and tabulation was

the supply to the Agency offices of a sufficient number of the necessary working sheets and registers. The indent for enumeration books, which was based on the supposed number of blocks that had been demarcated, could not safely be followed. A block might include more than one village, and a large village might contain several blocks, whereas tabulation had to deal with *villages*, taking no account of the blocks into which they were divided for the purposes of enumeration.

91. Regarding the provision of working sheets and registers, the Political Agents were, in November 1890, addressed in the following terms —

"It will be observed that a record is required of the number of villages and of the population of each. It is pointed out that if the abstraction were carried out by blocks, it would be impossible to obtain such a record in the abstraction sheets, as some of the blocks probably include more than one village. It is desirable, then, that the abstraction should be conducted in such a way that each village will be abstracted on its separate sheets, and your indent will be based therefore not on the number of blocks in any given pargana or area, but on the number of blocks relating to villages or towns, as a whole, *plus* the number of small villages therein included."

"The indents for tabulation registers should be based on the calculation given in the Census Commissioner's instructions, that is to say, on the number of working sheets, one register being sufficient to include the tabulated results of 20 working sheets (ten items on each page, twenty in all). A further number of registers will be required for town, pargana, and State registers, as well as for wastage for these purposes 20 per cent. should be added to the calculation above specified."

"I annex a specimen form for exhibiting the indents in question, together with the figures on which they are based. The information now asked for should be submitted in the form in question at your early convenience."

93 The working of the abstraction and tabulation offices will appear from the following circulars addressed to Political Agents

Work g f A b t r a c t O f f i c e s

Circular of 13th February 1891

1 The Census works subsequent to enumeration cannot now be fully explained as the final forms to be adopted for the Native States in Central India have not yet been decided upon. But it is hoped that this note will prove self-sufficient for the work of abstraction and tabulation whatever final forms are afterwards prescribed. What additions or alterations appear necessary will be intimated from time to time.

2 The different operations in the working of the Census are —

- (1) Enumeration
- (2) Compilation of Enumerators' abstracts
- (3) Abstract on
- (4) Tabulation
- (5) Compilation

3 With regard to numeration (which is to begin when lamps are lighted on the night of the 26th February 1891) and to be finished before the following morning) full instructions have already been issued and if those instructions are duly carried out no difficulty is likely to arise.

4 The compilation of Enumerators' abstracts should begin on the following day. The work ought not to take more than four days even in States like Gwalior and Indore. In all cases it ought to have been finished in time for the books to reach the Agency head

"5 As a preliminary to abstraction, the books should, as soon as they arrive at the Agency Head Quarters, be arranged according to charges, circles and blocks by the supervising establishment, who should have been entertained in February to make all necessary preparations for the reception of the books. The Agency Superintendent of Census, who will be responsible for the safe custody of the books, will prepare a receipt to the Durbar officials for every parcel of books received. It is presumed that instructions have been issued to the officials in charge of the Census in each State to keep the books of each Pargana separate and arranged by block and circles.

"6 The record-keepers, who are appointed before the Census, are presumed to have been provided with racks and all necessary furniture before the books arrive. The record-keeper's duties are to arrange the books, as soon as he gets them, according to Parganas and States, to label the shelves, and to open a register of the books thus arranged. When the books are given out for abstraction he has to take out the enumerator's abstracts from the books and deposit them under lock and key. He is to arrange the abstraction sheets in a cupboard or box, and be careful not to issue more of them at a time than are absolutely required. He is to keep strict account of the issue and receipt of books in the following form —

ROOM No

[illegible]

"7 The Room Inspector's duties are to receive the books from the Record-keeper every morning for the Abstractors under his charge (passing a receipt for them to the Record-keeper), to pass the sheets to the Totallers as they are ready, to return the books and sheets to the Record-keeper, when finished, and to collect the unfinished books every evening and deposit them, duly labelled, with the name of the men to whom they belong, with the record-keeper, who will put them into a separate box provided for the purpose. He further is to see that the Abstractors do not scribble on the books and do not com-

communicate with one another. He is to open a register and enter the books against the names of the Abstractors under his charge as he gives them out and on receiving them back fully finished he is to note against each book the number of entries made by each Abstractor. This will show the average output of work and the comparative efficiency of the Abstractors whose pay should sink and rise accordingly.

8 For Abstraction for working sheets have been adopted

No 1 for Ages and Religions

No 2 for Castes

No 3 for Birth places

No 4 for Occupations

For the working of these sheets there are two systems which may be called the Reading aloud system and the Independent working system.

On the first system a set of five men work simultaneously on one book one man reading aloud and the other four making entries each on one of the four sheets. The reader reads a line (to give an instance) —

Male — 10 years — Hindu — Rajput — Independent — over

The 1st writer makes a mark thus — / on the male side of his sheet under Hindu against 10 14

The 2nd writer enters Hindu under Religion and Rajput under caste and makes a similar mark against Rajput in the male column.

The 3rd writer writes Indore under Birth place and makes a mark against Indore in his male column.

The 4th writer writes weaver under Occupation and dependent on the line below and makes a similar mark against Dependent in the male column.

For easy reckoning when four entries have been made together the fifth should be marked by a line drawn across all four thus //

There is less chance of mistakes if the reader takes all the males in a book first and then reads all the females.

The reader makes a tick with his pencil against each name as he reads it.

On the independent working system the entries are made in the same way as described above but on this system a book is not completely abstracted by one set of five men simultaneously each sheet is filled up from the book separately by men who if possible work in four separate rooms according to the sheet on which they work. The men in each room work independently of each other except in the case of Sheet 1 for which it is thought better to have two men working (one reading and the other making the entries). So whatever be the number of clerks available there will always be twice as many engaged on Sheet No 1 as on any of the others.

9 Both systems have been tried here. The reading aloud system was the one that was adopted in Central India in the 1881 Census and it has many things to recommend it especially when the working staff is small. The independent working system though it requires more space than the other undoubtedly requires more supervision and therefore as Mr Baker in his Circular No 154 of 29th September 1890 recommends this system it may be adopted in all the Census offices in Central India.

10 To test the correctness of the figures it is necessary that 50 to 20 per cent of the book should be reabstracted and for this work the most efficient Abstractors should be selected.

11 When books of several Parganas of a State have been abstracted (and proportionally a number of them reabstracted) a set of 4 men should be set apart for tabulation.

12 There are five Tabulation Registers —

No 1 for Religions

No 2 for Ages by Religions

No 3 for Castes

No 4 for Birth place

No 5 for Occupations

Register Nos 1 and 2 can be filled in directly from Abstraction Sheet No 1. These two registers can be filled in by one Tabulator.

Register No 4 which can be filled in from Abstraction Sheet No 3 might be done by another Tabulator.

Register No 3, which can be filled in from Abstraction Sheet No 2, and Register No. 5, which can be filled in from Abstraction Sheet No 4, should have two men working together, one man to dictate and the other to make entries"

"13 The tabulated returns should not be totalled by the Tabulators, but two men should be especially set apart for this purpose"

" 14 It will be more convenient if for every 20 villages or blocks the complete set of Tabulation Registers is made up into one book. A complete book for 20 villages or blocks will contain as follows —

- 1 Copy of Register No 1
16 Copies of Register No 2 (each religion will be tabulated on a separate register, so 8 forms will be required for males and 8 for females)
8 Copies of Register No 3 (the Caste Return of Hindus will be very long, so 8 copies of this register, 4 for males and 4 for females, had better be taken)
4 Copies of Register No 4 (2 for males and 2 for females)
8 Copies of Register No 5 (4 for males and 4 for females)'

37

" 15 Thus a book of Tabulation Registers for 20 villages or blocks will contain in all 37 Registers Care should be taken that the headings on each register are clearly written, and the totals of each village or town should be shown in red ink "

Circular of 5th March 1891

" The Census Commissioner's remarks on this office note on abstraction and tabulation are as follows —

1 It should now be taken as decided that Final Imperial Tables Nos I, II, III, IV, V, VI, VII, XI, XVI, and XVII, as given in pages 83-89 of Census Proceedings, Part I (Enumeration), should be adopted for Central India. In consequence of the adoption of Final Table XVII in which information regarding occupation *by age* is required,—

(a) it will be necessary to divide the Male and Female columns in Abstraction Sheet No. 4 into 3 age periods, thus —

[illegible]

(b) "dependents" on an occupation will not, as stated in paragraph 8 of the previous note, be taken apart from workers "

"2 The *independent working* system is to be adopted, as the Census Commissioner thinks that the *reading aloud* system is unsafe (a) because it admits of judging totals and consequently re abstraction is necessary, (b) it introduces two extra elements of error—wrong dictation and wrong hearing"

"3 In the concluding portion of paragraph 8 it was suggested that Abstraction Sheet I should have two men working on it (one reading and the other making the entries), but after further experiment, undertaken on Census Commissioner's suggestion, it is thought advisable to have only one man for sheet No 1"

"4 With reference to paragraph 10 of the note it is proposed that no special set of men should be appointed for re-abstraction, but that every abstractor should have his turn

at that work. Thus there will be less chance of collusion and it will be easy to arrange a system whereby all Abstractors not only lose marks by making mistake but also have a chance of earning marks by finding out the mistakes made by others.

5 On Tabulation Registers a further note will be issued later on as the Census Commissioner's suggestion on this office note requires further reference.

Circular of 20th March 1891

It is considered advisable to call the attention of the Census officers to the necessity of taking the enumerator's abstracts out of the book before the latter is given out for abstraction and also of seeing that the abstracts are locked up so that they cannot be used as guides by Abstractors or Totallers.

It will be well also to make a rule that no one should have access to the Abstractors while they are at work and that no Abstractor should leave his desk till he has finished a book on which he has begun and has returned it with his sheet to the Room Inspector. Further care must be taken that the Abstractors do not tot up for them the male and female entries in the book on which they are at work because if they are once in possession of the actual totals they will be tempted to add or subtract a few ticks in the abstraction sheets so as to make the results tally.

The following is recommended as the best method of keeping Census Records.

As soon as all the books for one State are received by the Record keeper he will give them a serial number for each State and bolded ink figures and arrange them in the racks according to States in order of serial numbers. He will issue the books with the blank abstraction sheet to the Room Inspector very morning in the order of the serial numbers keeping a record of the same. The form given in the first note paragraph 6 should be modified so as to give a column for the bolded numbers. The Room Inspector before issuing the books and abstraction sheets to his Abstractor will write with red ink the bold figure at the top of each abstraction sheet the bolded number of the book with which that sheet is given out. The Room Inspector will bring every evening all the completed books and sheets to the Record keeper who will pass a receipt. The Record keeper will arrange all sheets in one folio all sheet II in another and so on according to the serial numbers.

When about 100 books have been fully abstracted the Superintendent should compare the totals of all the folios belonging to one book with one another and if the total of any of them are found not to tally the book to which they belong should be given out for reabstraction. The reabstraction will show which of the Abstractors has gone wrong. But even when the totals on the sheets tally it will be well to have a considerable number of books reabstracted. This will lead to detection if any of the Abstractors do what is mentioned above *vs* add or rub out ticks to accommodate the figures to a total already ascertained.

The religion of Jains is to be shown separately from that of Hindus so that of Aborigines (Bhil Gond Mowhya Mang Maher Mina Kol Deswal etc).

I Abstract on Sheet I Jains and Aborigine must therefore be abstracted by themselves. In the sheet Bhils Gonds etc will all be grouped under the category Aborigines.

In Abstraction Sheet II Jains must be entered *ss h b th th el g r and cast* column and Aborigines must be entered *n d tal e* to say in the religion column the word Aborigine religion should be entered and Bhil Gond etc in the caste column.

It was suggested in the first note paragraph 14 that for every 20 villages a book of 37 register of all kinds should be prepared. But the Census Commissioner has overruled this and has decided that for each Pargana and for a whole State if it does not contain more than 150 to 200 blocks all the registers of one kind should be bound separately in all registers I to one book all registers II to another and so on. Thus for each Pargana or small State of 150 to 200 blocks there will be 5 books of Tabulation Registers the book of Register I consists of (according to the number of blocks included) of 15 to 20 pages that of Register II of 120 to 16 pages that of Register III of 120 to 160 pages that of Register IV of 60 to 80 pages that of Register VA of 60 to 80 pages and that of Register VB of 60 to 80 pages.

The Census Commissioner has decided also to be made ready all the Abstractors Office in the Central India Agency. It is hoped that this will be done with a few weeks. In the meantime any delay and difficulty that arises should be referred to the India Census Office.

94 By the middle of March all the Agency Abstraction offices were ready with their contingents of clerks, and work might have been begun at once, had the necessary forms been received in time from the Press at Calcutta. In most of the offices the few weeks of forced inactivity were utilised in practising the clerks in the proper method of doing their work, on manuscript forms, the instructors being those of their number, or of the supervising staff, who had had the advantage of a preliminary training in the Indore Office.

95 To secure as much uniformity as possible in the work generally and particularly in dealing with doubtful entries in the enumeration books, all the Agency Offices, except Guna, which is very much out of the way, were visited at least once by the Superintendent of Census Operations in Central India.

96 In Native States the cost of abstraction was understood to be borne by the Durbars, the Census grant providing only menial servants, the cost of accommodation, where such was incurred, and the supervising establishment, (Office Superintendent, Record-keepers, Room Inspectors and Totallers). But the State of Rewa asked to be allowed to pay for the whole establishment of its abstracting office, which, as has already been remarked, was distinct from the Baghelkhand Agency Abstracting Office at Sutna, and was personally looked after by Pandit Het Ram, C I E, the late Dewan.

97 The work of abstraction was a good deal retarded at first by several difficulties that had to be faced in all the offices alike. These were mainly due to errors and imperfections in the work of the enumerators. Entries such as "bacha," in column 3, as well as in column 2, were common. Sometimes persons were entered as Sikhs or Jains in column 6, and as Hindus in column 5. Aborigines also were a source of difficulty in column 5. To obviate the difficulty as much as possible in the case of the latter, a list of all the aboriginal tribes known to exist in Central India was prepared in the Indore Office, and circulated, in Hindi and Urdu, to the Agency Offices. In countless cases names of towns were given in the Birth-place column, and from those it was often, of course, impossible to conjecture the Province or State of birth. To help the adjusting of such entries, an elaborate list of the chief towns in every district of British India was prepared and circulated. Other difficulties in the Birth-place column were such entries as "Ingrezi Ilaka," which was found on inquiry to mean the Central Provinces, and "Madhya Hindustan." Again persons described in column 6 as "sutars" or "lohars" by caste were frequently entered "mazduri" in column 8. In the latter column such entries as "bepar" or "naukari" were very common.

98 Notwithstanding these and other difficulties, there is every reason to believe that the work of abstraction, as well as of the subsequent operation of tabulation, was efficiently carried out all over Central India. An unfortunate blunder was made in the Bundelkhand Office, which made it necessary for Abstraction Sheet No. 4 to be done over again for a large number of books, the Superintendent of the Office having neglected the instructions issued in March 1891* as to the abstraction of occupations by age.

99 On the limits of permissible error in abstraction, the following circular, based on the instructions of the Census Commissioner, was issued on 1st May 1891.

"Attention has frequently been drawn to discrepancies in the abstraction sheets. The general direction in such cases is, in accordance with the Census Commissioner's instructions, that the books be abstracted over and over again till the sheets tally.

* See page 58

Som specimens of the test slips used the Indore Abstracting Office for the comparison of the abstract on sheets accompany this note and their adoption in all the agencies recommended.

But it is useless to expect that the abstraction can be more accurate than the material on which it works and taking into consideration the correct details in many of the enumeration books and the difficulty arising from the abstraction and seeing that the time also by which the work should be finished is very limited it is thought advisable to relax the general deduction and to make some attempt to fix certain limits within which the head of each office should be allowed to correct by adjustment the errors caused by those test slips.

It is difficult to lay down more than general principles in a matter of this sort but on the whole it may be said that it may be necessary to let pass one or more of the total of each enumeration sheet details the error generally is in excess the largest of several unequal portions of the sheet. It is probable that the average will be more correct in Sheet I than those sheets which contain more irregularly produced elongations in the same way will be more correct Sheet II than Sheet I. In the case of elongations as a rule a book will contain but a few items of a different form from that of the majority so that the error is speedily rectified by examination of the book itself for that reason one of the committees. When a sheet passed correct for occupations but the age does not correspond with those in Sheet I it is a matter for adjustment in the occupation sheet. Generally speaking Sheet I which has always been used upon which the most important forms of the four should be altered as far as possible. The elongation and occupation sheets should therefore be selected for adjustment as is thought necessary.

One rule must be observed though it is not that in the case of the one country population and the other can be allowed and this only on the understanding that the statistical utility by means of the test slip has previously been made.

100 Regarding the completion of the Registers and the form in which they were to be transmitted to Indore, the following instructions were issued in July 1891 —

"It is hoped that that the tabulation work in your agency is now in progress, and will be finished by the middle of August at the latest

"I am to send herewith a copy of the list of States as arranged for compilation at Indore, and to say that your Tabulation Registers should be prepared in the order of that list. When ready for despatch to Indore the Registers should be packed in separate bundles by States and Parganas, a label being affixed to each bundle giving full details of its contents

"With the Tabulation Registers you are requested to send a list of the number of occupied houses in each Pargana of the States in your agency

"It is further requested that all possible care be taken in the preparation of the Tabulation Registers. Any doubts or difficulties that occur in filling up the Registers should be at once referred to the Indore office. The headings in the Registers should be written in 'Balbodh,' wherever practicable, and as distinctly as possible. The totals of each page should be brought forward till a Pargana, or, in the case of small States, a State is completely tabulated, the totals that are entered at the bottom of each page are to be brought forward to the top of the next page till the whole Pargana, or, in the case of small States, the whole State is finished, but the totals entered in the last column of each page are to be brought forward and entered in the column of the next page immediately after the block number column till every ten blocks or villages are completely tabulated. It may be noted with reference to Register No 1 (All Religions), that a column should be provided at the end of this register to show the total population of both the sexes in each village. Column I in all the registers is meant for the serial numbering of villages only."

101 Nothing can be said here regarding the abstraction and tabulation of the fourteen-column schedules on which, as has been seen, residents in cantonments and all Europeans were enumerated. Those schedules were abstracted at Ajmir, and the tabulated results sent to the Indore office for compilation

SECTION VI—COMPILATION OF TABULATED RETURNS

102 The tabulated registers began to arrive at the Indore office in the month of July 1891 and the work of compilation was at once started. The staff employed was a selection of the most efficient members of the supervising staff of the Indore Agency Abstraction Office.

103 The various compilation sheets were in the form given below—

105 In the submission of the slips difficulty and delay several times arose with regard to the Baghelkhand Agency in consequence of there being a few outlying villages of the States of Rewa and Nagode in the Allahabad and Jabal pur Districts for which information had to be awaited from the Census Offices of the North West Provinces and the Central Provinces respectively. It would save much trouble in the next census if the territorial system were strictly applied not only in the enumeration but also in the subsequent operations of the census. In 1891 the enumeration and tabulation of the villages in question were carried out in British India but the results were compiled with the population of the States to which the villages belong and excluded from the totals of the two Provinces.

106 All the sheets except those for Caste and Occupation were compiled by the middle of May 1892. The greater part of the staff was then dispensed with and the attention of the office concentrated on Tables XVI, XVII and XVII A. These were very long and tedious to compile and it is very questionable whether the result is worth the time and trouble that it took to attain it. The Caste and Occupation columns were those which had been most unsatisfactorily filled up in the Enumeration Books and they were also those on which the abstractors had had to exercise most ingenuity in guessing what the entries meant. Many anomalies in the Agency tables are the consequence—anomalies which the Indore Office could do nothing to rectify at the time of compilation and can now do very little to explain. But it may be said with some confidence that the best use was made that could be made of the materials available. When the Census Commissioner left for England in May 1892 the work was sufficiently advanced for a manuscript copy of Table XVI to be given to him. Tables XVI and XVII A were finished in October 1892 by which time nearly all the preceding tables had been printed.

SECTION VII—COST OF THE CENTRAL INDIA CENSUS

107 The cost to the Imperial Government of the 1891 Census in Central India is estimated at Rs 42,987 4 4. The details are given below.

108 The cost of enumeration apart from that of the office establishment at Indore (then very small) and of the Enumeration Books and their carriage from Calcutta to the Agency centres was borne entirely by the States.

109 The total cost of the Enumeration Books and Schedules used in the Central India Agency (including those used for Railway and Cantonment population and for European residents in Native States) was Rs 7,781 15 11. From these enumeration charges there should be deducted the cost of the books supplied to the Gwalior State Rs 3,667 6 9 which the Durbar volunteered to pay for and also a contribution of Rs 200 made by the State of Bhopal.

110 The total cost of compiling the returns so far as it was borne by the Census grant was Rs 33,253 9 2. This sum does not cover the cost of tabulating the fourteen column schedules at Ajmir.

111 The charge on account of printing this report cannot yet be accurately stated. It is estimated at Rs 5,635.

112 The following statement shews the cost to the Imperial Government of the 1891 Census in Central India —

Headings		Amount	Amount
<i>Enumeration—</i>		<i>R a p</i>	<i>R a p</i>
Establishment	.	818 0 0	
Contingencies		132 11 3	
Enumeration Books for Native States and Cantorments		7 782 15 11	
Total cost on account of Enumeration			8,733 11 2
<i>Abstraction, Tabulation and Compilation—</i>			
		<i>R a p</i>	
Establishment	{ 1890-91	796 5 6	
	{ 1891 92	17,472 10 11	
	{ 1892 93	1,637 0 4	19 906 0 9

	{ 1891 92	2,738 11 10	
	{ 1892 93	42 1 1	7,131 2 11
Total cost on account of Abstraction, Tabulation, and Compilation			33 253 9 2
Honorarium to the Superintendent of Census Operations in Central India			1,000 0 0
TOTAL			42 987 4 4
Estimated cost of printing 1,000 copies of the Report			5,635 0 0
GRAND TOTAL,			48,622 4 4

113 The item of R818 under heading *Enumeration* Establishment requires some explanation. The amount is the salary of the clerk in the Office of the Agent to the Governor General, who was deputed for duty in connection with the Census.

114 As regards the items of expenditure incurred in connection with tabulation, etc., in the year 1890-91, it should be explained that, although the actual tabulation of returns did not begin till April 1891, a good deal of preliminary expense was unavoidable. The supervising establishment of the Agency Office had to be entertained as early as February 1891, furniture had to be supplied, and the travelling expenses of clerks sent to Indore for instruction, and distributed afterwards over the different Agency offices, had to be paid.

R H. GUNION

TABLE II

Variation in the enumerated population since last Census

NOTE —In 1881 the compilation was by States and not as in this Census by Agencies. Many of the Central India States have territory in more than one Agency and as all the registers of the 1881 Census have been destroyed there are no figures available for comparison except in the case of the Baghelkhand Agency none of the States under which have any outlying territory in other Agencies.

Table II.—Variation in the enumerated population—Central India.

SUPPLEMENTARY TABLE,

Shewing the population of Central India (Native States and British occupations) by religions.

NOTE.—In column 3 one to n has been entered against Dewas (S. B.) and one against Dewas (J. B.) but those towns are really one hence the total for States 6, 7 and 8 in Indore Agency is 1.
The grand total at the end of this table exceeds the grand total of those tables which are prepared by Agencies inasmuch as the Gwalior and Indore Districts in Meywar are not included in the latter.

Supplementary Table, shewing the population of Central
